

CONTENTS

The Potential Use of Quality Control Data to Validate Pesticide Residue	
Method Performance	1
Optimization and Evaluation of Multi-residue Methods for Priority Pesticides	
in Drinking and Related Waters	9
Validation of Analytical Data in a Research and Development Environment	19
Performance Validation of a Multi-residue Method for 170 Pesticides in Kiwifruit	29
Effects of Sample Processing on pesticide Residues in Fruit and Vegetables	41
Testing the Efficiency and Uncertainty of Sample Processing Using	
¹⁴ C-Labelled Chlopyrifos : Part I. Description of the Methodology	79
Testing the Efficiency and Uncertainty of Sample Processing Using	
¹⁴ C-Labelled Chlopyrifos : Part II	59
Testing the Effect of Sample Processing and Storage on the Stability of Residues	75
AOAC International Collaborative Study on the Determination of Pesticide	
Residues in Nonfatty Foods by Supercritical Fluid Extraction and Gas	
Chromatography/Mass Spectrometry	89
Validation of Analytical Methods – Proving Your Methods is ‘Fit for Purpose’	100
Validation of a Multi-residue Method for Analysis of Pesticides in Fruit,	
Vegetables and Cereals by a GC/MS iontrap System	108
Development and Validation of a Genetic Gas Chromatographic Method	
For the Determination of Organophosphorus Pesticide Residues in Various	
Sample Extracts	120
Validation of Gas Chromatographic Databases for Qualitative Identification of	
Active Ingredients of Pesticide Residues	128
Estimation of Significance of ‘Matrix-induced’ Chromatographic Effects	138
Worked Example for Validation of a Multi-residue Method	157
EU Guidance Documents on Residue Analytical Methods	176
Guidelines for Single-Laboratory Validation of Analytical Methods	
for Trace-level Concentrations of Organic Chemicals	179
A Critique on Available In-house Method Validation Documentation	253
Subject Index	297
