

CONTENTS

List of Contributors

1. Solid State Mass Spectrometry Using a Laser Microprobe	1
2. Pyrolysis and Desorption Mass Spectrometry	42
3. Gas Phase Curie Point Pyrolysis	69
4. Fourier Transform Infrared Evolved Gas Analysis (FT-IR-EGA)-Another Pyrolytic Tool	95
5. Analytical Pyrolysis of Coal Using FT-IR	121
6. Numerical Techniques for Processing Pyrolysis Mass Spectra Data	157
7. Heat Transfer Mechanisms for Analytical Pyrolysis	196
8. Application of Analytical Pyrolysis Techniques to Kerogen Characterization and Fossil Fuel Exploration/Exploitation	212
9. Geochemical Logging	276
10. Pyrolysis-Collisionally Activated Dissociation Mass Spectrometry of Organic Model Compounds and Bacterial Samples	305
11. Potential Applications of Curie Point Pyrolysis Mass Spectrometry with Emphasis on Food Science	324
12. Studies of the Pyrolysis Behaviour of Condensed Phase Fuels with Applications to Fuel Conversion Technology	349
13. Pyrolysis-Gas Chromatographic Studies on the Microstructures of Stereospecific Polypropylenes	407
14. Practical Analytical Pyrolysis Applications for the Polymer Industry	428
15. Studies of Volatile Pyrolyzate, Smoke and Char Formation in Poly (Vinyl Chloride)	453
