

CONTENTS

1. Historical Review	1
2. Survey of Types of chromatographic Packings and Stationary Phases and Their Role in Separation Processes	43
3. Solid and Liquid Stationary Phases in Gas Chromatography	87
4. Supports and Stationary Phases in Liquid-Liquid Partition Chromatography	235
5. Sorbents and Precoated Layers in Thin-Layer Chromatography	251
6. Adsorbents in Column Liquid Chromatography	331
7. Packings in Size Exclusion Chromatography	471
8. Packings in Donor-Acceptor Complex Chromatography	511
9. Packings in Ligand Exchange Chromatography	541
10. Ion Exchangers	585
11. Packings and Stationary Phases for Ion Pair Chromatography	721
12. Packings in Affinity Chromatography	747
13. Theory and Design of Chiral Stationary Phases for the Direct Chromatographic Separation of Enantiomers	783
Index	815
