

## CONTENTS

1. Quality Tests	1
2. Significant Pathogens in Dairy Products	10
3. Sampling Dairy Products	28
4. Culture Media and Preparation	47
5. Standard Plate Count Method	71
6. Coliform Bacteria	88
7. Thermoduric, Thermophilic, and Psychrotrophic (Psychrophilic) Bacteria	100
8. Screening and Confirmatory Methods for the Detection of Abnormal Milk	105
9. Detection of Inhibitory Substances in Milk	133
10. Microbiological Methods for Concentrated Milk and Dry Milk	138
11. Microbiological Methods for Butter	146
12. Microbiological Methods for Cheese and Other Cultured Products	150
13. Microbiological Methods for Ice Cream and Related Frozen Products	154
14. Direct Microscopic Method	158
15. Reduction Methods	177
16. Microbiological Tests for Equipment, Supplies and Water	188
17. Sediment in Fluid Milk	195
18. Phosphatase Methods To Determine Pasteurization	200
19. Chemical Methods	219
20. Radionuclides In Milk	254
21. Simplified Technics for Viable Counts of Raw Milk	282
