

TABLE OF CONTENTS

Technical Committee	v
Contributors	vii
Consensus Reviewers	xi
Preface	xiii
STANDARD METHODS	1
Introduction of 1/ Function of Standard Methods 1/ Classification of Procedures 2/ Adopting New Methodology 4/ Collaborative Studies 4/ Uniformity of Methods 5/ Split Sample Test Program 6/ Relation of Farm and Plant Inspections with Laboratory Control 6/ Accuracy of Methods for Measuring Sanitary Quality 6/ References 8	
2. LABORATORY QUALITY ASSURANCE AND SAFETY	9
Introduction 9/ Laboratory Operational Management 9/ Laboratory Facilities 15/ Laboratory Equipment and Supplies 17/ Control Tests and Record Keeping 25/ Laboratory Safety 26/ References 42	
3. PATHOGENS IN MILK AND MILK PRODUCTS	43
Introduction 43/ Raw Milk 44/ Pasteurized Milk 53/ Cheese 54/ Cultured Milks 70/ Butter 72/ Nonfat Dried Milk 73/ Frozen Desserts 78/ References 79	
4. SAMPLING DAIRY AND RELATED PRODUCTS	89
Fluid Milk and Cream Samples 89/ Other Dairy Products 101/ Sampling for Specific Laboratory Procedures 110/ References 116	
5. MEDIA	119
Introduction 119/ Suitability of Water for Microbiological Applica- tions 119/ Preparation of Dilution Water 121/ Water Toxicity Tests 122/ Cleaning Glassware and Testing for Detergent Residues 122/ Media 123/ Basic Steps in Media Preparation 124/ Adjustment of pH 125/ Formulae and Directions for Preparation of Culture Media 125/ Sterilization and Storage 129/ Quality Control 130/ References 131	

6. MICROBIOLOGICAL COUNT METHODS	133
Introduction 133/ Standard Plate Count 133/ Preliminary Incubation for Raw Milk 146/ Moseley Keeping Quality 147/ Keeping Quality of Pasteurized Milk, Impedimetric Method 148/ References 148	
7. ALTERNATIVE MICROBIOLOGICAL METHODS	151
Introduction 151/ Collection and Storage of Samples Before Testing 151/ Statistical Protocol for an Analyst 152/ Plate Loop Method 152/ Spiral Plate Count Method 156/ Oval Tube Method 164/ Electrical Impedence Method 165/ References 170	
8. COLIFORM BACTERIA	173
Introduction 173/ Definitions 174/ General Interpretations 174/ Sampling 175/ Equipment, Supplies, and Media 175/ General Procedure 175/ Relative Values of Plate and Tube Methods 176/ Coliform Test with a Solid Medium 177/ Coliform Test with a Liquid Medium 179/ Confirmed Test from a Solid Medium 179/ Completed Test from a Liquid Medium 180/ Reporting Results 180/ Table of MPN Coliforms 182/ Impedimetric Coliform Detection Method: Raw Milk 182/ Hydrophobic Grid Membrane Filter Method 183/ References 185	
9. TESTS FOR GROUPS OF MICROORGANISMS	189
Thermoduric Bacteria 189/ Thermophilic Bacteria 191/ Proteolytic Microorganisms 191/ Lipolytic Microorganisms 192/ Enterococci 193/ Aerobic Bacterial Spores 194/ Psychotrophic Bacteria 194/ Yeast and Mold Counts 197/ References 198	
10. MICROBIOLOGICAL METHODS FOR DAIRY PRODUCTS	203
Introduction 203/ Evaporated, Concentrated and Sweetened Condensed Milks and Liquid Infant Formulas 203/ Ultra-High Temperature Processed, Aseptically Packaged, Low-acid Products 207/ Dry Dairy Products 208/ Butter, Margarine and Related Products 210/ Cheese and Other Cultured and Culture-added Products 211/ Ice Cream and Related Food Products 214/ References 216	
11. DIRECT MICROSCOPIC METHODS FOR BACTERIA AND SOMATIC CELLS	219
Introduction 219/ Application to Raw Milk 219/ Application to Pasteurized Milk 220/ Application to Dry Milk 220/ Source of Error in the Microscopic Method 220/ Procedure for Collecting Samples 221/ Equipment and Supplies 221/ Materials 226/ Adjustment and Calibration of Microscope 226/ Calculation of the Microscopic Factor (MF) 226/ Using Transfer Instruments and Preparing Films 227/ Handling of Slides During Staining 228/ Preparation and Use of Stains 229/ Storage of Slides 230/ Examining Films for Bacteria or Somatic Cells 230/ Field-wide Single Strip Method 231/ Field Method 231/ Strip Count Methods 233/ Reporting Counts 236/ References 236	

12. METHODS TO DETECT ABNORMAL MILK	239
Introduction 239/ Screening Tests 239/ Confirmatory Tests 249/ References 256	
13. REDUCTION METHODS	259
Introduction 259/ Standards 260/ Sampling 260/ Equipment and Supplies 260/ Preparing Dye Solution 261/ Testing Samples 261/ Methylene Blue Reduction Method 261/ Resazurin Reduction Method 262/ References 264	
14. DETECTION OF ANTIBIOTIC RESIDUES IN MILK AND DAIRY PRODUCTS	265
Introduction 265/ <i>Bacillus subtilis</i> Disc Assay 266/ Qualitative <i>Bacillus stearothermophilus</i> var. <i>calidolactis</i> Disc Assay 269/ Quan- titative <i>Bacillus stearothermophilus</i> var. <i>calidolactis</i> Disc Assay 272/ Delvotest -P- Ampule and Multi Test Procedures 275/ The Charm Screening Assay for Beta-Lactam Residues 279/ Modified <i>Sarcina lutea</i> Cylinder Plate Method for Detection of Penicillin in Nonfat Dry Milk 281/ Specific Antimicrobial Cylinder Methods 285/ Detection of Sulfa Drugs and Antibiotics in Milk 285/ References 287	
15. MICROBIOLOGICAL TESTS FOR EQUIPMENT, CONTAINERS, WATER AND AIR	289
Introduction 289/ Sample Collection 289/ Tests for Equipment Sanitation 289/ Standard Tests for Water Supplies 300/ Tests for Microbiological Quality of Air 300/ References 303	
16. SEDIMENT IN MILK	305
Introduction 305/ General Methods 306/ Equipment and Supplies 306/ Preparation and Use of Standard Sediment Discs 308/ Procedure 308/ References 309	
17. PHOSPHATASE METHODS	311
Introduction 311/ General Precautions for Methods Employing Disodium Phenyl Phosphate 312/ Controls Applicable to all Phos- phatase Procedures 313/ Scharer Rapid Phosphatase Test 315/ Rapid Colorimetric Phosphatase Method 318/ Rutgers Phosphatase Test 320/ Phosphatase Reactivation in Dairy Products Treated by High- temperature, Short-time Methods 322/ References 324	

18. CHEMICAL AND PHYSICAL METHODS 327
Introduction 327/ Acid Degree Value 327/ Acidity 329/ Ash and Alkalinity of Ash 336/ Chloride 339/ Chlorine, Available 344/ Extraneous Matter: Cheese 346/ Fat 347/ Multi-component Methods 366/ Moisture and Solids 373/ Protein 382/ Water: Added to Milk 394/ Iodine: Selective Ion Procedure 398/ Pesticide Residues in Milk 400/ Radionuclides 401/ References 402
