

Table of Contents

1. Introductory Guidelines for the Use of This Manual

1.1	Safety	3
1.2	Quality Control and Quality Assurance	7
1.3	Precision; Precision Statements	9
1.4	Precision; Daily Replicate Sample Analyses	10
1.5	Accuracy; Accuracy Statements	12
1.6	Accuracy; Daily Spiking Sample Analyses	14
1.7	Sample Preservation	16
1.8	Suggestions for Filtering of Water Samples	17
1.9	Use of Volumetric Glassware	18
1.10	Making Standard Solutions	19
1.11	Preparation of Acid and Alkaline Solutions	21
1.12	How to Wash Laboratory Glassware	22
1.13	Cleaning of Spectrophotometer Cells	24

2. Methods for Determining Physical Properties

2.1	Specific Conductance	45
2.2	Residue I: Nonfilterable Residue	48
2.3	Residue II: Total and Total Filterable	51
2.4	Settleable Matter, By Weight	53
2.5	Turbidity, Nephelometric Method	54

3. Methods for the Determination of Metals

✓ 3.1	Calcium, EDTA Titrimetric Method	59
✓ 3.2	Hardness, EDTA Titrimetric Method	62
3.3	Hexavalent Chromium, Colorimetric Method	64

3.4	Preparation of Samples for the Determination of Metals, Atomic Absorption (AA) or Inductively Coupled Plasma Emission Spectroscopy (ICP) Methods	67
-----	--	----

4. Methods for the Determination of Inorganics and Nonmetals

4.1	Acidity, Titrimetric and Potentiometric Methods	73
4.2	Alkalinity, Potentiometric and Colorimetric Methods	76
4.3	Calcium Carbonate Saturation, Langelier Saturation Index	81
4.4	Aggressive Index	84
4.5	Boron, Carmine Method	86
✓4.6	Chloride, Mercuric Nitrate Titrimetric Method	89
4.7	Residual Chlorine, Amperometric Titration Method	92
4.8	Residual Chlorine, DPD Colorimetric Method	96
4.9	Cyanide, Titrimetric and Ion-Selective Electrode Methods	98
4.10	Fluoride, SPADNS Method	105
4.11	Low-Level Fluoride, Ion-Selective Electrode Method	108
4.12	Ammonia, Preliminary Distillation Step, Nesslerization and Titrimetric Methods	111
4.13	Ammonia, Low-Level Indophenol Method	116
4.14	Ammonia, High-Level Indophenol Method	119
4.15	Nitrite-Manual, Diazotization Method	121
4.16	Nitrate-Manual, Cadmium-Reduction Method	124
4.17	Nitrate; Nitrite, Colorimetric/Automated Cadmium- Reduction Methods	129
4.18	TKN, Total Kjeldahl and Organic Nitrogen, Digestion, Distillation, and Nesslerization Methods	132
4.19	Total Nitrogen, Persulfate Method	137

4.20	Dissolved Oxygen (DO). Winkler with Azide Modification Method	140
4.21	Reactive (Ortho) Phosphate. Ascorbic Acid or Murphy-Riley Method	143
4.22	Total Phosphorus	146
4.23	Total Phosphorus in Sediments. Persulfate Digestion Method	148
✓ 4.24	Silica. Molybdosilicate Method	151
4.25	Sulfate. Turbidimetric Method	153
4.26	Sulfate. Gravimetric Method with Drying of Residue	155
✓ 4.27	Sulfite. Titrimetric Method,	159

5. Methods for the Determination of Organics

5.1	Biochemical Oxygen Demand (BOD) Method	163
5.2	Chemical Oxygen Demand (COD). Manual Method: Dichromate Reflux	168
5.3	Chemical Oxygen Demand (COD). Ampule Method	173
5.4	Oil and Grease. Partition-Gravimetric Method	178
5.5	Surfactants. Methylene Blue Active Substances (MBAS) Method	182
5.6	Organic Carbon in Soils. Dichromate Method	186
5.7	Preparation of Samples for Trihalomethane Determination. Gas Chromatography Method	189

6. Methods for Biological Determination

6.1	Plankton and Periphyton Pigments. Chlorophyll. Spectrophotometric Method	197
6.2	Plankton and Periphyton Pigments. Chlorophyll. Fluorometric Method	203
6.3	Total Coliform. Membrane Filter Method	214
6.4	Fecal Coliform. Membrane Filter Method	218
6.5	Heterotrophic (Standard) Plate Count Method	222

Appendix A, Precision and Accuracy Forms	225
Appendix B, Atomic Weights	229
Definitions of Abbreviations, Terms, and Units	231
Bibliography	235
Index	239
