

CONTENTS

One Methods of Preparation	1
1.1 COLLAGEN	1
1.2 GELATIN	8
1.3 SUBSTANCES ASSOCIATED WITH THE CONNECTIVE TISSUES	15
Two Primary Analytical Measurements on Total Protein	32
2.1 THE DETERMINATION OF ASH	32
2.2 THE DETERMINATION OF MOISTURE	34
2.3 THE DETERMINATION OF TOTAL NITROGEN	36
2.4 THE DETERMINATION OF PROTEIN	41
Three Amino Acid Analysis	45
3.1 ION-EXCHANGE CHROMATOGRAPHY – THE METHOD OF MOORE & STEIN	45
3.2 THE DETERMINATION OF HYDROXYPROLINE	71
3.3 THE DETERMINATION OF TYROSINE	73
3.4 THE DETERMINATION OF AMIDE NITROGEN	76
Four The Dinitrophenyl End Group Method	79
Five The Analysis of Carbohydrate Sub-units	86
5.1 THE DETERMINATION OF CARBOHYDRATE WITH ANTHRONE	87
5.2 THE DETERMINATION OF PENTOSE WITH ORCINOL	91
5.3 THE DETERMINATION OF HEXOSAMINES	92
5.4 THE DETERMINATION OF HEXURONIC ACIDS WITH CARBAZOLE	96
5.5 THE DETERMINATION OF SIALIC ACIDS WITH THIOBARBITURIC ACID	97
Six Properties of the Macromolecule	99
6.1 THE ISOIONIC POINT	99
6.2 VISCOSITY	101
6.3 RIGIDITY MODULUS OF A GEL	109
6.4 SWELLING AND SHRINKAGE OF COLLAGEN	111
6.5 ABSORPTION OF ELECTROMAGNETIC RADIATION	114
6.6 OPTICAL ROTATION	121

Seven Thin-layer Chromatography	126
7.1 SEPARATION OF AMINO ACIDS	127
7.2 SEPARATION OF DINITROPHENYL-AMINO ACIDS	130
7.3 SEPARATION OF MONOSACCHARIDES AND OF DISACCHARIDES	131
References	134
Index	139
