

CONTENTS

PART ONE Principles of Analytical Chemistry	
1. Introduction	3
2. Expression of Analytical Results	13
3. Basic Tools of Analytical Chemistry	19
PART TWO Data Handling	57
4. Data Handling	59
PART THREE Preparing the Sample	79
5. Preparing a Solution of the Analyte	80
PART FOUR Methods of Separation	87
6. Gravimetric Analysis	88
7. Solvent Extraction	115
8. Chromatographic Methods	132
PART FIVE Volumetric Methods of Measurement	185
9. Principles of Volumetric Analysis	186
10. Acid-Base Equilibria	203
11. Acid-Base Titrations	225
12. Nonaqueous Titrations	250
13. Precipitation and Complexometric Titrations	268
14. Reduction-Oxidation Titrations	295
PART SIX Electrical Methods of Measurement	333
15. Potentiometry and Potentiometric Titrations	334
16. Electrolytic Methods	382
PART SEVEN Optical Methods of Measurement	415
17. Spectrometry	417
18. Atomic Spectroscopic Methods	467
PART EIGHT Measurements Based on Rate	487
19. Kinetic Methods of Analysis	488
20. Radiochemical Methods of Analysis	511

PART NINE Gas Measurements	537
21. Gas Analysis	538
PART TEN Automation in the Laboratory	549
22. Automation in the Laboratory	550
PART ELEVEN Applications of Analytical Chemistry	559
23. Clinical Chemistry	560
24. Drug Analysis: Narcotics and Dangerous Drugs	583
25. Pollution Analysis	597
