

## CONTENTS

**Chapter 1**

CALCULATING FOR AMOUNT, CONCENTRATION, AND PREPARATION OF REAGENTS	1
1.1 Review of Basic Chemical Concepts	1
1.2 Calculating Concentrations Based on Mole	5
1.3 Calculating Concentrations Based on Weight	7
1.4 Dilution Factor in Concentration Calculations	10
1.5 Preparing Reagents	11
1.6 Practical Examples	13

**Chapter 2**

BUFFERS: PRINCIPLES, CALCULATIONS AND PREPARATION	31
2.1 Principles	31
2.2 Buffer, pH and pOH Calculations	34
2.3 Preparation of Buffers and Related Topics	39
2.4 Practical Examples	42

**Chapter 3**

SPECTROPHOTOMETRY: BASIC PRINCIPLES AND QUANTITATIVE APPLICATIONS	55
3.1 Principles and Techniques	55
3.2 Quantitative Aspects and Basic Applications	56
3.3 Practical Examples	61

**Chapter 4**

ENZYME ASSAYS AND ACTIVITY	67
4.1 Introduction	67
4.2 Conditions For Quantitative Enzyme Assays	68
4.3 Enzyme Activity and Units	72
4.4 Basic Kinetic Constants	74
4.5 Practical Examples	76

**Chapter 5**

RADIOACTIVITY AND RELATED CALCULATIONS	83
5.1 Introduction	83
5.2 Calculations Involving Radioactivity	84
5.3 Practical Examples	86
