

CONTENTS

CHAPTER 1. INTRODUCTION	1
1.1. Quality in chemical analysis	7
1.2. Quality control	10
CHAPTER 2. SAMPLING	14
2.1. Definitions	14
2.2. Purpose of sampling	16
2.3. Types of objects and samples	17
2.4. Sample quality	20
2.5. Sampling parameters	22
2.6. Handling of samples	59
2.7. Quality control of sampling	67
CHAPTER 3. ANALYSIS	70
3.1. Characteristics of an analysis	70
3.2. Quality of an analytical procedure	72
3.3. Selection of an analytical procedure	102
3.4. Quality control	104
3.5. Sequential analysis	122
CHAPTER 4. DATA PROCESSING	134
4.1. Data production	134
4.2. Information theory	144
4.3. Data reduction	163
4.4. Data reconstruction and curve fitting	180
4.5. Data handling	188
4.6. Analysis of variance	200
4.7. Pattern recognition	207
4.8. Optimization	217
4.9. Computational aspects	225
CHAPTER 5. ORGANIZATION	230
5.1. Planning	230
5.2. Organization and management	249
INDEX	267
