

CONTENTS

1. Modern Methods of Chemical Analysis	1
2. Selection of Chemical Methods	23
3. Factors Influencing the Accuracy of Results	37
4. Thermal Transformations	55
5. Radiation Emission and Radioactivity	73
6. The Absorption of Radiation	121
7. Interactions with Magnetic Fields	177
8. Reflection, Refraction, and Rotation of Light	225
9. Structure	259
10. Basic Solution Chemistry	299
11. Ionic Reactions-Titrimetric Analysis	335
12. Ionic Reactions-Selective Procedures and Kinetics	391
13. Electrical Transformations	429
14. Adsorption, Diffusion, and Ion Exchange	489
15. Heterogeneous Equilibria	553
16. The Challenge of Automation	587
