

CONTENTS

GENERAL CONSIDERATIONS	1
RECOMMENDED METHODS	3
General preparation of the sample	3
Determination of boron	4
Determination of calcium	8
Determination of chloride	9
Determination of chromium	10
Determination of cobalt	12
Determination of copper	13
Determination of fluorine	15
Determination of iodine	17
Determination of iron	21
Determination of magnesium	22
Determination of manganese	27
Determination of molybdenum	28
Determination of nickel	29
Determination of selenium	31
Determination of zinc	34
Oxine extraction and chromatographic separation of trace metals	36
