Chapter 1	Achieving Valid Trace Analysis	1
1.1	Introduction	1
1.1.1	What is Trace Analysis?	1
1.1.2	The Importance of Trace Analysis in Today's World	2
1.1.3	Difficulty of Achieving Reliable Trace Analysis	3
1.1.4	How Can the Reliability of Trace Analysis be Improved?	7
1.1.5	The Purpose and Structure of This Book	8
1.1.6	References	9
1.2	The Approach to Quality	9
1.2.1	Overview	9
1.2.2	Fitness for Purpose	10
1.2.3	The Resources for Trace Analysis	11
1.2.4	Laboratory Operations	14
1.2.5	Quality Control, Monitoring, and Auditing	18
1.2.6	References	20
1.3	The Approach to Trace Analysis	21
1.3.1	The Special Needs of Trace Analysis	21
1.3.2	The Structure of Trace Analysis Methods	21
1.3.3	Classification by Analyte and Matrix	23
1.3.4	Reference	24
1.4	Analytical Methodology	25
1.4.1	Terminology	25
1.4.2	Method Selection and Development	31
1.4.3	Method Validation	36
1.4.4	References	39
Chapter 2	Sample Handling	40
2.1	Sample Storage and Stability	40
2.1.1	Introduction and Overview	40
2.1.2	Storage Conditions	41
2.1.3	Storage Containers	43
2.1.4	References	44
2.2	Sample Pre-treatment, Homogenisation, Sub-sampling, and Potential Sources of Contaminants	45
2.2.1	Introduction and Overview	45
2.2.2	Sample Pretreatment	46

2.2.3	Ensuring Homogeneity of the Bulk Material and Taking a Sub-sample	48
2.2.4	Sample Particle Size Reduction	53
2.2.5	Sample Reduction (Division) and Particle Size Separation (Sieving)	54
2.2.6	Sources of Contamination and Uncertainty	56
2.2.7	References	59
Chapter 3	Inorganic Analytes: Sample Preparation	61
3.1	Introduction	61
3.1.1	Overview	61
3.1.2	Where Errors Occur	62
3.1.3	Precautions Against Errors	64
3.1.4	Choice of Acids	65
3.1.5	Handling Acids Safely	67
3.1.6	Reference	68
3.2	The Destruction of Organic Matrices	68
3.2.1	Overview	68
3.2.2	Comparison of Techniques	70
3.2.3	General Precautions	75
3.2.4	Practical Advice	77
3.2.5	References	81
3.3	Decomposition and Dissolution of Inorganic Matrices and Residual Inorganic Material from Organic Matrices	83
3.3.1	Overview	83
3.3.2	Comparison of Techniques: Acid Decomposition	83
3.3.3	General Precautions	86
3.3.4	Critical Aspects	87
3.3.5	Uncertainty	87
3.3.6	References	89
3.4	Separation and Preconcentration in Inorganic Analysis	89
3.4.1	Overview	89
3.4.2	Comparison of Techniques	90
3.4.3	References	93
Chapter 4	Inorganic Analytes: Determination	95
4.1	Introduction	95
4.1.1	Overview	95
4.1.2	Sample Presentation: the Form of the Matrix	96
4.1.3	The Analyte	97
4.1.4	Summary	98
4.2	Atomic Spectroscopy	98
4.2.1	Overview	98
4.2.2	Comparison of Techniques for Different Sample Types	99
4.2.3	Comparison of Techniques	103

4.2.4	Interferences and How to Deal with Them	110
4.2.5	Hints and Tips	112
4.2.6	Factors Affecting Quality	116
4.2.7	Safety Features	117
4.2.8	Applications	117
4.2.9	References	118
4.3	Elemental Mass Spectrometry	120
4.3.1	Overview	121
4.3.2	Comparison of Techniques	122
4.3.3	Physical and Spectral Interferences in ICP-MS	126
4.3.4	Modes of Sample Introduction	130
4.3.5	Modes of Data Acquisition in ICP-MS	130
4.3.6	Isotope Ratio and Isotope Dilution Analysis	133
4.3.7	Calculation of Elemental Concentration from Isotope Dilution Measurements	136
4.3.8	Analysis of Organic Samples by ICP-MS	138
4.3.9	Uncertainty (Errors)	139
4.3.10	Applications	140
4.3.11	References	141
4.4	The Chromatography of Ions	142
4.4.1	Introduction and Overview	142
4.4.2	Ion Separation Mechanisms	142
4.4.3	Methods of Detection	145
4.4.4	Critical Aspects	149
4.4.5	Practical Advice	150
4.4.6	References	152
Chapter 5	Organic Analytes: Sample Preparation	153
5.1	Introduction to Planning and Preparation for Organic Analyses	153
5.1.1	Overview	153
5.1.2	Potential Difficulties with Organic Analyses	153
5.1.3	Planning a Trace Organic Analysis	155
5.2	Methods of Extraction of Organic Analytes from Solid Samples	157
5.2.1	Overview	157
5.2.2	Choice of Extraction Technique	159
5.2.3	Choice of Solvent	166
5.2.4	Hints and Tips	170
5.2.5	Uncertainty Associated with Extraction	172
5.2.6	References	173
5.3	Methods of Extraction of Organic Analytes from Liquid Samples and Clean-up of Liquid Extracts	175
5.3.1	Overview	175
5.3.2	Comparison of Techniques	176
5.3.3	Critical Aspects and General Precautions	187
5.3.4	Hints and Tips	190

5.3.5	Associated Uncertainty	196
5.3.6	References	197
5.4	Concentration of Organic Extracts	198
5.4.1	Overview	198
5.4.2	Comparison of Techniques	199
5.4.3	Critical Aspects and General Precautions	203
5.4.4	Associated Uncertainty	206
5.4.5	References	206
Chapter 6	Organic Analytes: Determination	207
6.1	Introduction to The Determination of Organic Analytes	207
6.1.1	Overview	207
6.1.2	Choice of Technique	209
6.2	Gas Chromatography	213
6.2.1	Overview	213
6.2.2	Comparison of Techniques	214
6.2.3	Gas Chromatographic Injection	220
6.2.4	Columns and Stationary Phases	222
6.2.5	Gas Chromatographic Detectors	224
6.2.6	Associated Uncertainty	226
6.2.7	References	228
6.3	High Performance Liquid Chromatography	229
6.3.1	Overview	229
6.3.2	Comparison of Techniques	230
6.3.3	Solvents and Mobile Phases	236
6.3.4	Practical Advice	242
6.3.5	Hints and Tips	245
6.3.6	Associated Uncertainty	247
6.3.7	References	250
6.4	Thin Layer Chromatography	251
6.4.1	Overview	251
6.4.2	Comparison of Techniques, General Precautions, and Critical Aspects	252
6.4.3	References	258
6.5	Organic Mass Spectrometry	259
6.5.1	Overview	259
6.5.2	Comparison of Mass Spectrometers	261
6.5.3	Methods of Introducing the Sample into the Mass Spectrometer	264
6.5.4	Ionisation Techniques	266
6.5.5	Scanning Modes	267
6.5.6	Tandem Techniques	269
6.5.7	General Precautions	271
6.5.8	Critical Aspects	272
6.5.9	Hints and Tips	273

6.5.10	Uncertainty in Identification	276
6.5.11	Uncertainty in Quantitation	277
6.5.12	Applications	279
6.5.13	References	279
6.6	Isotope Dilution Mass Spectrometry (IDMS)	280
6.6.1	Overview	280
6.6.2	Comparison of Techniques	281
6.6.3	General Precautions	284
6.6.4	Critical Factors	285
6.6.5	Hints and Tips	286
6.6.6	Uncertainty	287
6.6.7	Applications	289
6.6.8	References	290
Chapter 7	The Analysis of Speciated Elements	294
7.1	Introduction	294
7.2	Extraction of the Analyte and Preparation of a Test Solution	295
7.3	Comparison of Determination Techniques	296
7.3.1	Separation Methods	296
7.3.2	Methods of Detection	298
7.4	Critical Factors when using Coupled Techniques	302
7.4.1	Length of Transfer Lines when Coupling to LC Systems	302
7.4.2	Use of the Correct Nebuliser	304
7.4.3	The Spray Chamber	305
7.4.4	Coupling Lines for GC	305
7.4.5	Mass Spectrometer Cones and Lens Stacks	307
7.4.6	The Use of Organic Solvents	307
7.5	General Precautions and Tips	309
7.6	References	310
Chapter 8	Techniques Suitable for Both Inorganic and Organic Analytes	312
8.1	Absorption and Emission of Ultraviolet and Visible Radiation	312
8.1.1	Overview	312
8.1.2	Scope of UV/Visible Absorption Spectrophotometry	312
8.1.3	Quantitative Applications of UV/Visible Spectrophotometry	314
8.1.4	Photoluminescence and Chemiluminescence	316
8.1.5	UV/Visible Absorption Spectrophotometry in Practice	318
8.1.6	Colorimetric Procedures	321
8.1.7	Photoluminescence and Chemiluminescence Analyses	322
8.1.8	Checking and Maintaining Instrument Performance	324
8.1.9	References	327
8.2	Electrochemical Techniques	328
8.2.1	Overview	328
8.2.2	Potentiometric Methods	329

8.2.3	Potentiometric Techniques: Hints and Tips	334
8.2.4	Voltammetric Methods	335
8.2.5	Stripping Voltammetry	338
8.2.6	Pulsed Voltammetry	339
8.2.7	Voltammetry: Hints and Tips	340
8.2.8	Bioelectroanalysis	340
8.2.9	References	341
8.3	Bioanalytical Techniques	342
8.3.1	Overview	342
8.3.2	Enzyme/Substrate Reactions	344
8.3.3	Immuncassays	351
8.3.4	DNA Analysis	361
8.3.5	References	367
Chapter 9	From Signal Processing to Reporting	371
9.1	Signal Processing	371
9.1.1	Overview	371
9.1.2	Good Automated Laboratory Practice (GALP)	372
9.1.3	Signal Integrity	374
9.1.4	Spectroscopic Signals	377
9.1.5	Chromatographic Signals	378
9.1.6	References	381
9.2	Data Handling	381
9.2.1	Overview	381
9.2.2	Statistical Methods	381
9.2.3	Measurement Uncertainty	385
9.2.4	Sources of Uncertainty	387
9.2.5	References	389
9.3	Reporting of Results	389
9.3.1	Overview	389
9.3.2	Customer Requirements	390
9.3.3	References	391
Appendix 1:	Some Frequently Used Acronyms and Technical Abbreviations	392
Appendix 2:	Some Sources of Reference Materials	395
Subject Index		398
