| Contributors to Vol XLI | vi |
| Volumes in the Series | xiii |
| Series Editor's Preface | xliii |
| Preface | xliv |
| Acronyms | xlvi |
| | |
| Chapter 1. Sampling and sample preservation for trace element analysis | 1 |
| 1.1 Introduction | 1 |
| 1.2 Preliminary considerations | 2 |
| 1.3 Types of samples | 3 |
| 1.4 Planning the sampling operation | 5 |
| 1.5 Statistical sampling | 8 |
| 1.6 Sample handling and preservation during collection, transport, and storage | 14 |
| 1.7 Quality assurance in sampling [24, 25] | 17 |
| 1.8 Glossary | 18 |
| References | 20 |
| Selected bibliography | 21 |
| | |
| Chapter 2. Sources of analyte contamination and loss during the analytical process | 23 |
| 2.1 Introduction | 23 |
| 2.2 Contamination | 24 |
| 2.3 Losses | 29 |
| 2.4 Sampling | 34 |
| 2.5 Storage | 35 |
| 2.6 Drying and homogenisation | 37 |
| 2.7 Dilution, dissolution and digestion | 39 |
| 2.8 Separation and preconcentration | 41 |
| 2.9 Element measurement | 42 |
| References | 42 |
| | |
| Chapter 3. Calibration approaches for trace element determination | 47 |
| 3.1 Introduction | 47 |
| 3.2 Basic assumptions and some terminology | 48 |
| 3.3 Selection of the calibration approach | 49 |
| 3.4 Statistics evaluation of recovery data | 52 |
| 3.5 Linear regression | 55 |

| | | |
|-------------------|--|------------|
| 3.6 | External calibration | 67 |
| 3.7 | Method of standard additions | 74 |
| 3.8 | Internal standardization | 79 |
| 3.9 | Isotope dilution | 81 |
| | Acknowledgements | 90 |
| | References | 90 |
| Chapter 4. | Stated references for ensuring traceability of trace element analysis | 93 |
| 4.1 | Introduction | 93 |
| 4.2 | Meaning of traceability for chemical measurements | 94 |
| 4.3 | SI units | 96 |
| 4.4 | Documented standards | 96 |
| 4.5 | Reference methods | 97 |
| 4.6 | Reference materials | 99 |
| 4.7 | Specimen banking | 105 |
| 4.8 | Proficiency testing | 105 |
| 4.9 | Real-case achievement of traceability of trace element analysis | 106 |
| 4.10 | Conclusions | 113 |
| | References | 114 |
| Chapter 5. | Detection methods for the quantitation of trace elements | 117 |
| 5.1 | Introduction | 117 |
| 5.2 | Classical methods | 117 |
| 5.3 | Flame spectrometry | 118 |
| 5.4 | Electrothermal AAS | 135 |
| 5.5 | Inductively coupled plasma-atomic emission spectrometry | 142 |
| 5.6 | Inductively coupled plasma-mass spectrometry | 152 |
| 5.7 | Atomic fluorescence spectrometry | 160 |
| 5.8 | Other atomic absorption, emission and fluorescence methods of detection | 164 |
| 5.9 | Secondary ion mass spectrometry | 165 |
| 5.10 | Glow discharge mass spectrometry | 171 |
| 5.11 | X-ray fluorescence spectrometry | 176 |
| 5.12 | UV/Visible spectrophotometric and chemiluminescence techniques | 179 |
| 5.13 | Electrochemical methods | 183 |
| | References | 186 |

DIGESTION AND EXTRACTION APPROACHES

| | | |
|-------------------|---|------------|
| Chapter 6. | Wet digestion methods | 193 |
| 6.1 | Introduction and brief history | 193 |
| 6.2 | Nomenclature | 194 |
| 6.3 | Bibliography | 194 |
| 6.4 | Reagents and vessel materials for wet digestion procedures | 195 |
| 6.5 | Wet acid digestion (decomposition and dissolution) procedures | 199 |
| 6.6 | Conclusion and future trends | 224 |
| | References | 228 |
| | | |
| Chapter 7. | Dry ashing | 235 |
| 7.1 | General considerations | 235 |
| 7.2 | Why dry ashing? | 238 |
| 7.3 | Oxidation process and dissolution of the residue | 240 |
| 7.4 | Methodology | 244 |
| 7.5 | Particular cases of arsenic and selenium | 248 |
| 7.6 | Conclusions | 253 |
| | References | 254 |
| | | |
| Chapter 8. | Microwave based extraction | 257 |
| 8.1 | Introduction | 257 |
| 8.2 | Brief history of industrial microwave devices | 257 |
| 8.3 | Microwave theory | 258 |
| 8.4 | Microwave laboratory equipment | 263 |
| 8.5 | Vessels | 270 |
| 8.6 | Control systems | 275 |
| 8.7 | Methodology | 281 |
| 8.8 | Sample types | 285 |
| 8.9 | Advanced applications | 297 |
| 8.10 | Conclusions | 299 |
| | Acknowledgements | 299 |
| | References | 299 |
| | | |
| Chapter 9. | Fusion and fluxes | 301 |
| 9.1 | Introduction | 301 |
| 9.2 | Fusion in lithium borates | 301 |
| 9.3 | The key to successful fusion beads | 305 |
| 9.4 | Application to trace element analysis | 308 |
| 9.5 | Features of fusion for trace elements | 309 |
| | References | 310 |

| | |
|---|------------|
| Chapter 10. Supercritical fluid extraction | 313 |
| 10.1 Properties of supercritical fluids | 313 |
| 10.2 Instrumentation | 316 |
| 10.3 SFE of trace elements | 318 |
| 10.4 Organometallic compounds | 332 |
| 10.5 Conclusion | 339 |
| References | 340 |
| | |
| Chapter 11. Accelerated solvent extraction of organometallic and inorganic compounds | 343 |
| 11.1 Accelerated solvent extraction as a sample preparation technique | 343 |
| References | 352 |
| | |
| Chapter 12. Sonication as a sample preparation method for elemental analysis | 353 |
| 12.1 Introduction | 353 |
| 12.2 Methodological considerations | 354 |
| 12.3 Historical background | 357 |
| 12.4 Applications – sonication and sample preparation | 358 |
| 12.5 Summary | 366 |
| References | 366 |
| | |
| Chapter 13. Solid phase microextraction as a tool for trace element determination | 371 |
| 13.1 Introduction | 371 |
| 13.2 General description of solid phase microextraction | 373 |
| 13.3 Solid phase microextraction : step-by-step method development | 375 |
| 13.4 Solid phase microextraction for speciation analysis | 380 |
| 13.5 Solid phase microextraction as an investigative tool | 380 |
| 13.6 Limitations of solid phase microextraction | 388 |
| 13.7 Isotope dilution calibration in combination with solid phase microextraction | 389 |
| References | 390 |
| | |
| Chapter 14. Solid-phase extraction | 393 |
| 14.1 Introduction | 393 |
| 14.2 Theory | 393 |
| 14.3 Step-by-step method development guide | 410 |
| 14.4 Applications of SPE to the determination of some trace elements | 439 |
| 14.5 Conclusion | 450 |
| References | 451 |

| | |
|--|------------|
| Chapter 15. Chelation solvent extraction for separation of metal ions | 459 |
| 15.1 Introduction | 459 |
| 15.2 Theoretical considerations | 460 |
| 15.3 Adsorption of metal ions using chelating resins | 474 |
| 15.4 Application of chelations to sample preparation for trace metal analysis | 477 |
| References | 492 |
| | |
| Chapter 16. Cryogenic trapping for speciation analysis | 495 |
| 16.1 Introduction | 495 |
| 16.2 Definition of volatile species | 502 |
| 16.3 Physico-chemical principles and processes associated with cryofocusing | 504 |
| 16.4 Analytic constraints | 509 |
| 16.5 Sample preservation and stability | 517 |
| 16.6 Instrumentation for cryogenic trapping and selected applications | 520 |
| References | 529 |
| | |
| Chapter 17. Biotrapping as an alternative to metal preconcentration and speciation | 533 |
| 17.1 Introduction | 533 |
| 17.2 General characteristics of biological substrates | 535 |
| 17.3 Uptake mechanisms | 538 |
| 17.4 Working procedures | 541 |
| 17.5 Applications | 546 |
| 17.6 Conclusions | 557 |
| References | 557 |
| | |
| Chapter 18. Membrane extraction | 559 |
| 18.1 Introduction | 559 |
| 18.2 Membrane extraction techniques | 559 |
| 18.3 Chemical principles for metal extraction | 566 |
| 18.4 Properties of membrane extraction | 566 |
| 18.5 Experimental set-up | 570 |
| Acknowledgements | 574 |
| References | 574 |
| | |
| Chapter 19. Derivatization and vapor generation methods for trace element analysis and speciation | 577 |
| 19.1 Introduction | 577 |
| 19.2 Theory | 578 |
| 19.3 Method development | 583 |
| 19.4 Applications | 585 |
| Acknowledgements | 590 |
| References | 590 |

| | |
|--|------------|
| Chapter 20. Laser ablation sampling | 593 |
| 20.1 Introduction | 593 |
| 20.2 Experimental system | 594 |
| 20.3 Ablation detection systems | 599 |
| 20.4 Calibration | 601 |
| 20.5 Fractionation | 603 |
| 20.6 Conclusion | 604 |
| Acknowledgements | 606 |
| References | 606 |
| | |
| Chapter 21. Flow injection techniques for sample pretreatment | 611 |
| 21.1 Introduction | 611 |
| 21.2 FI liquid – liquid extraction systems | 615 |
| 21.3 FI solid phase extraction systems | 626 |
| 21.4 FI vapor generation systems | 635 |
| 21.5 FI gas diffusion systems | 641 |
| 21.6 FI on-line sample digestion | 643 |
| References | 646 |
| | |
| Chapter 22. Automation of sample preparation | 649 |
| 22.1 Introduction | 649 |
| 22.2 Automation of liquid sample preparation | 653 |
| 22.3 Automation of solid sample preparation | 659 |
| 22.4 Robotics | 660 |
| 22.5 Advantages and disadvantages of automation of sample preparation | 767 |
| 22.6 Future prospects | 677 |
| References | 678 |
| | |
| Chapter 23. Sample preparation for crude oil, petroleum products and polymers | 683 |
| 23.1 Introduction | 683 |
| 23.2 Sample preparation techniques and instrumentation | 693 |
| 23.3 Cleanliness and quality assurance | 713 |
| Acknowledgements | 718 |
| References | 719 |
| | |
| Chapter 24. Sample preparations of geological samples, soils and sediments | 723 |
| 24.1 Introduction | 723 |
| 24.2 Sample preparation | 723 |
| 24.3 Choice of approach | 728 |
| 24.4 Methods that do not require any sample digestion – in situ methods of analysis | 730 |
| 24.5 Methods based on solid samples | 733 |

| | | |
|--------------------|---|------------|
| 24.6 | Dissolution methods based on acid attack | 735 |
| 24.7 | Decomposition by molten salt fusion | 750 |
| 24.8 | Pre-concentration and separation procedures | 753 |
| 24.9 | Sequential extractions and dissolutions | 755 |
| 24.10 | Summary and conclusions | 758 |
| | References | 758 |
| Chapter 25. | Sample preparation for food analysis | 765 |
| 25.1 | Introduction | 765 |
| 25.2 | Literature | 766 |
| 25.3 | Pretreatment | 768 |
| 25.4 | Classification of sample treatment methods | 770 |
| 25.5 | Compilation of sample treatment methods for foods | 770 |
| 25.6 | Specific cases : methods, elements, matrices | 839 |
| 25.7 | Examples of specific, recommended sample treatment procedures | 843 |
| 25.8 | Closing remarks | 846 |
| | References | 847 |
| Chapter 26. | The determination of trace elements in water | 857 |
| 26.1 | Direct methods of determination | 857 |
| 26.2 | Preconcentration techniques – multielement | 860 |
| 26.3 | Preconcentration – individual elements | 865 |
| 26.4 | Determination of trace element as volatile species | 865 |
| 26.5 | Mercury | 879 |
| 26.6 | Luminescence | 880 |
| 26.7 | Voltammetry | 885 |
| 26.8 | Total-reflection X-Ray fluorescence spectrometry | 891 |
| 26.9 | Conclusions | 894 |
| | References | 894 |
| Chapter 27. | Aerosol sampling and sample preparation for elemental analysis | 903 |
| 27.1 | Introduction | 903 |
| 27.2 | Sampling of aerosols | 906 |
| 27.3 | Sequential extraction schemes for aerosol samples | 924 |
| 27.4 | Discussion | 930 |
| | Acknowledgements | 931 |
| | General terms used in sampling | 931 |
| | References | 932 |

| | |
|--|-------------|
| Chapter 28. Sample preparation for industrial waste analysis | 935 |
| 28.1 Types of industrial waste | 935 |
| 28.2 Safety considerations for industrial waste analysis | 936 |
| 28.3 Sample characteristics and industrial waste sampling | 936 |
| 28.4 Digestions | 938 |
| 28.5 Leach procedures | 950 |
| 28.6 Certified reference materials | 957 |
| 28.7 Summary and future developments | 957 |
| 28.8 Useful World Wide Websites | 960 |
| | |
| Chapter 29. Sample preparation for semiconductor materials | 965 |
| 29.1 Introduction | 965 |
| 29.2 Contamination control | 969 |
| 29.3 Sample preparation | 976 |
| 29.4 Conclusion | 986 |
| References | 986 |
| | |
| TRACE ELEMENT SPECIATION | |
| | |
| Chapter 30. Sampling and sample treatment in the analysis of organotin compounds in environmental samples | 991 |
| 30.1 Introduction | 991 |
| 30.2 Critical steps in organotin analysis | 994 |
| 30.3 Improving the quality of organotin measurements in Europe | 1005 |
| 30.4 Detailed procedure for the GC-MS determination of organotin compounds in environmental samples | 1017 |
| Acknowledgements | 1020 |
| References | 1021 |
| | |
| Chapter 31. Sample preparation for arsenic speciation | 1027 |
| 31.1 Introduction | 1027 |
| 31.2 Occurrence and distribution of arsenic in the environment | 1028 |
| 31.3 Stability of arsenic compounds | 1033 |
| 31.4 Extraction of arsenic compounds from environmental samples | 1038 |
| 31.5 Conclusions | 1041 |
| References | 1041 |
| | |
| Chapter 32. Sample preparation for speciation of selenium | 1045 |
| 32.1 Why selenium speciation? | 1045 |
| 32.2 General sample preparation | 1045 |
| 32.3 Mammals | 1046 |
| 32.4 Fish/birds | 1051 |

| | | |
|--------------------|---|-------------|
| 32.5 | Plants | 1051 |
| 32.6 | Microorganisms | 1055 |
| 32.7 | Environmental | 1055 |
| | References | 1059 |
| Chapter 33. | Sample preparation for mercury speciation | 1063 |
| 33.1 | Introduction | 1063 |
| 33.2 | Aqueous solution chemistry of methylmercury | 1063 |
| 33.3 | Sample collection, preservation and storage | 1065 |
| 33.4 | Sample preparation | 1069 |
| 33.5 | Quality control | 1075 |
| | Acknowledgements | 1079 |
| | References | 1079 |
| Chapter 34. | Sample preparation for speciation fo lead | 1081 |
| 34.1 | Introduction | 1081 |
| 34.2 | Toxicity of organolead compounds | 1083 |
| 34.3 | The history of leaded gasoline | 1085 |
| 34.4 | Properties of organolead compounds | 1088 |
| 34.5 | Synthesis of organolead compounds | 1090 |
| 34.6 | The biogeochemical cycle of lead | 1092 |
| 34.7 | Analytical techniques for speciation analysis of organolead compounds | 1092 |
| | References | 1111 |
| Chapter 35. | Sample preparation for chromium speciation | 1115 |
| 35.1 | The element and its reactivity | 1115 |
| 35.2 | The presence of Cr in nature and industrial processes | 1117 |
| 35.3 | Chemical species of Cr present in real samples | 1118 |
| 35.4 | Analytical methodologies available for determination of Cr | 1120 |
| 35.5 | Analytical methodologies for Cr speciation in water | 1120 |
| 35.6 | Analytical methodologies for Cr speciation in biological fluids | 1136 |
| 35.7 | Analytical methodologies for speciation of Cr in solid samples | 1145 |
| 35.8 | Final considerations | 1157 |
| | References | 1158 |
| Chapter 36. | Sample preparation for metal-based drugs | 1173 |
| 36.1 | Introduction | 1173 |
| 36.2 | Platinum-based drugs | 1173 |
| 36.3 | Gold-based drugs | 1180 |
| 36.4 | Mercury | 1181 |
| 36.5 | Vanadium | 1181 |
| 36.6 | Lead | 1182 |

| | | |
|--------------------|--|-------------|
| 36.7 | Conclusions | 1182 |
| | References | 1182 |
| Chapter 37. | Sample preparation for speciation analysis for metallobiomolecules | 1185 |
| 37.1 | Introduction | 1185 |
| 37.2 | Elemental species in biological systems : metallobiomolecules | 1186 |
| 37.3 | Tailoring sample preparation : definition of the analyte moiety | 1188 |
| 37.4 | Homogenization and analyte recovery using unreactive buffers | 1188 |
| 37.5 | Analyte recovery through partial degradation of sample matrix | 1190 |
| 37.6 | Fractionation of metal species according to the molecular weight prior to analytical chromatography or capillary electrophoresis | 1193 |
| 37.7 | Multidimensional LC clean-up procedures prior to characterization of metal species by electrospray MS | 1195 |
| 37.8 | Sample preparation prior to speciation analysis of biological fluids | 1196 |
| 37.9 | Sample preparation prior to speciation analysis in solid matrices | 1200 |
| 37.10 | Sources of error | 1205 |
| | References | 1206 |
| Chapter 38. | Sample preparation for the analysis of volatile metals species | 1211 |
| 38.1 | Introduction | 1211 |
| 38.2 | Species of interest | 1212 |
| 38.3 | Characterization of gas samples | 1216 |
| 38.4 | Sample preparation strategies | 1216 |
| 38.5 | Specific procedures | 1222 |
| 38.6 | Problems and future studies | 1229 |
| | References | 1230 |
| Chapter 39. | Sequential extraction | 1233 |
| 39.1 | Sequential extraction procedures : a special case of sample dissolution | 1233 |
| 39.2 | Types, uses and limitations of SEPs | 1235 |
| 39.3 | Sample pre-treatment for SEPs | 1246 |
| 39.4 | Application of other extraction techniques to SEPs | 1250 |
| 39.5 | Quality control for SEPs | 1252 |
| | References | 1253 |
| Index | | 1257 |
