

CONTENTS

1. The Analyst's Approach	1
2. Introduction to Sampling	34
3. Design of a Sampling Procedure	39
4. Methods of Taking Samples	60
5. Standardisation and Calibration	92
6. Analytical Standards and Calibration Curves	109
7. Standard-addition Methods	146
8. Internal-standard Methods	171
9. Calibration by Computational Means	187
10. Comparison of Calibration Procedures	201
11. Monitoring the Performance of Analytical Procedures	213
