

CONTENTS

Preface	xvii
Acknowledgments	xix
Cumulative Listing of Volumes in Series	xxi
CHAPTER 1 OVERVIEW OF SOLID-PHASE EXTRACTION	1
1.1. What is Solid-Phase Extraction?	1
1.2. How to do Solid-Phase Extraction	2
1.3. Columns and Apparatus for Solid-Phase Extraction	4
1.4. Sorbents and Modes of Interaction	9
1.5. Applications of Solid-Phase Extraction	13
1.6. Automation of Solid-Phase Extraction	16
1.7. Manufacturers and Bibliographies	17
1.8. History and Future of Solid-Phase Extraction	19
Suggested Reading	22
References	22
CHAPTER 2 THEORY OF SORPTION AND ISOLATION	25
2.1. Introduction	25
2.2. Synthesis of Sorbents	25
2.2.1. The Silica Particle	25
2.2.2. Bonded Phases	29
2.2.3. Polymeric Sorbents	36
2.3. Mechanisms of Sorption	38
2.3.1. Reversed Phase	38
2.3.2. Normal Phase	39
2.3.3. Ion Exchange	42
2.3.4. Mixed Mode	44
2.4. Elution of Sorbents in Solid-Phase Extraction	45

2.4.1. Reversed Phase	45
2.4.2. Normal Phase	47
2.4.3. Ion Exchange and Mixed Mode	48
Suggested Reading	48
References	49
CHAPTER 3 METHODS DEVELOPMENT	51
3.1. Six-Step Approach to Methods Development	51
3.1.1. What is Solute Structure? The Clue to Effective Solid-Phase Extraction	51
3.1.2. Identify the Goal	52
3.1.3. Obtain Physical Constants	52
3.1.4. Choose the Mechanism of Solid-Phase Extraction	54
3.1.5. Elute the Solid-Phase Extraction Sorbent	56
3.1.6. Perform the Sorption Experiment and Determine Breakthrough	60
3.2. Executing the Solid-Phase Extraction Experiment in Five Steps	62
3.2.1. Step 1	63
3.2.2. Step 2	63
3.2.3. Step 3	63
3.2.4. Step 4	64
3.2.5. Step 5	64
3.3. Troubleshooting and Optimizing a Method	64
3.3.1. Problem 1: Incomplete Elution	64
3.3.2. Problem 2: Breakthrough of Analyte	65
3.3.3. Problem 3: Significant Breakthrough of Analyte	65
3.3.4. Problem 4: Interfering Substances	66
3.4. Critically Evaluate Previously Published Methods	67
3.5. Simple Summary of Methods Development	69
Suggested Reading	69
References	69

CHAPTER 4	REVERSED-PHASESOLID-PHASE EXTRACTION	71
4.1.	Introduction	71
4.2.	Structure of Reversed-Phase Sorbents	72
4.3.	Reversed Phase as a Partitioning Mechanism	77
4.4.	Chromatographic Plate Theory and Reversed-Phase Solid-Phase Extraction	80
4.4.1.	Introduction	80
4.4.2.	Theoretical Aspects of Plate Theory	83
4.5.	Chromatographic Plate Theory: Its Application to Reversed-Phase Solid-Phase Extraction	88
4.5.1.	Introduction	88
4.5.2.	Determining and Predicting Breakthrough Volumes	92
4.5.3.	Polarity and Breakthrough	94
4.5.4.	Example Calculation of Breakthrough Volume using k'_w	95
4.5.5.	Practical Effects of Plate Number on Solid-Phase Extraction	96
4.6.	Examples of Methods Development with Reversed-Phase Solid-Phase Extraction	99
4.6.1.	Trace Enrichment of Pesticides from Groundwater	99
4.6.2.	Extraction of Protein from Dilute Aqueous Solution	100
4.6.3.	Extraction and Purification of Synthetic Oligonucleotides	101
4.6.4.	Extraction of Indole-3-Acetic Acid	102
4.6.5.	Extraction of Catecholamines from Urine	102
	Suggested Reading	103
	References	104
CHAPTER 5	NORMAL-PHASESOLID-PHASE EXTRACTION	105
5.1.	Introduction	105
5.2.	Structure and Sorption of Normal-Phase Sorbents	106
5.3.	Elution of Normal-Phase Sorbents	111

5.4. Examples of Methods Development with Normal-Phase Solid-Phase Extraction	112
5.4.1. Extraction of Aromatic Hydrocarbons from Crude Oil	113
5.4.2. Extraction of Polychlorinated Biphenyls from Transformer Oil	114
5.4.3. Extraction of Carotenes from Plant Tissue	115
5.4.4. Extraction of N-Nitrosoamine (N-Nitrosopyrrolidine) from Bacon	116
5.4.5. Extraction of Aflatoxins from Corn, Peanuts, and Peanut Butter	117
5.4.6. Extraction of Pyridonecarboxylic-Acid Antibacterials from Fish Tissue	118
5.4.7. Extraction of Vitamin D from Serum	119
5.4.8. Extraction of Antibiotics from Ointment	120
Suggested Reading	121
References	121

CHAPTER 6 ION-EXCHANGE SOLID-PHASE EXTRACTION	123
6.1. Introduction	123
6.2. Structure of Solid-Phase Extraction Ion-Exchanger Sorbents	126
6.2.1. Cartridges	126
6.2.2. Disks	131
6.3. Ion Exchange as a Chemical Reaction	132
6.4. Selectivity of Ion Exchange	132
6.5. Donnan Membrane Theory	135
6.6. Law of Chemical Equilibrium and Selectivity Coefficients	139
6.7. Kinetics of Ion Exchange	141
6.8. Methods Development: General Principles	141
6.8.1. Selecting Cation or Anion Exchange	142
6.8.2. Molecular Size and Weight	144
6.8.3. Interferences and Competing Ions	145
6.9. Methods Development Experiment	146
6.10. General Method for Ion-Exchange Solid-Phase Extraction	147

6.11.	Examples Using Ion-Exchange Solid-Phase Extraction	148
6.11.1.	Salt Conversions	148
6.11.2.	Preparation of Deionized Water	149
6.11.3.	Isolation of Metal Cations	150
6.11.4.	Isolation of Triazine Herbicides from Soil	151
6.11.5.	Purification of Organic Compounds	152
6.11.6.	Hydroxyatrazine Metabolites from Water	154
6.11.7.	Paraquat and Diaquat in Water	155
6.11.8.	Food and Beverage	155
6.11.9.	Food and Feeds	156
6.11.10.	Pharmaceutical and Biological Applications	157
6.11.11.	Extraction of Cimetidine from Urine	157
6.11.12.	Dacthal Isolation and Derivatization	158
	Suggested Reading	159
	References	159
CHAPTER 7	ENVIRONMENTAL ANALYSIS	161
7.1.	Structure and Chemistry of Micropollutants	161
7.2.	Generic Approach to Environmental Solid-Phase Extraction	163
7.3.	Water Samples and Trace Enrichment	164
7.3.1.	Introduction	164
7.3.2.	Removal of Interferences	166
7.3.3.	Generic Eluents	167
7.4.	Environmental Protection Agency Methods	168
7.4.1.	Cartridge Methods	168
7.4.2.	Disk Methods	170
7.5.	On-line Solid-Phase Extraction—High-Pressure Liquid Chromatography: Environmental Applications	172
7.6.	Large-Volume Analysis by Solid-Phase Extraction	173
7.7.	Soil Analysis and Solid-Phase Extraction	175
7.7.1.	Solid-Phase Extraction Cleanup	175
7.7.2.	Trace Enrichment	176
7.7.3.	Normal-Phase Solid-Phase Extraction of Soil Extracts	177

7.8.	Air Analysis and Solid-Phase Extraction	178
7.9.	Oil and Grease Analysis	180
7.10.	Examples of Environmental Solid-Phase Extraction	180
7.10.1.	Organochlorine Pesticides in Water	180
7.10.2.	Organochlorine Pesticides in Soil and Sediment	182
7.10.3.	Polyaromatic Hydrocarbons in Water and Soil	182
7.10.4.	Nonionic Herbicides in Water and Soil	184
7.10.5.	Organophosphorus Pesticides in Water and Soil	185
7.10.6.	Nonvolatile Organic Compounds: Carbamates, Substituted Amides, and Phenylureas in Water and Soil	187
7.10.7.	Herbicide Metabolites in Water and Soil	188
7.10.8.	Phenols and Chlorinated Phenols in Water and Soil	189
7.10.9.	Acid Herbicides (2,4-D, 2,4,5-T, Dicamba) and Sulfoarea Herbicides in Water and Soil	191
7.10.10.	Anionic Surfactants in Water and Soil	192
	Suggested Reading	193
	References	194
CHAPTER 8	DRUGS AND PHARMACEUTICALS	197
8.1.	Introduction	197
8.2.	Structure and Chemistry of Drugs	197
8.3.	Sample Matrix	198
8.4.	Mixed-Mode Sorbents	200
8.5.	Application of Mixed Mode	203
8.6.	Sorbents for Drug Analysis	204
8.7.	NIDA Drugs of Abuse	204
8.7.1.	Marijuana	204
8.7.2.	Cocaine	206
8.7.3.	Phencyclidine	206
8.7.4.	Amphetamines	207
8.7.5.	Opiates	208
8.8.	General Drug Analysis and Methods	209

8.9. Veterinary Applications	209
8.10. Examples of Methods for Pharmaceutical and Biological Analysis	209
8.10.1. Cyclosporine in Blood	210
8.10.2. Vitamin D in Serum	211
8.10.3. Lipids from Serum and Tissue	212
8.10.4. Vitamin B₁₂ in Urine or Aqueous Solution	213
8.11. Automation and On-line Solid-Phase Extraction for Drug Analysis	214
8.12. Disk Technology and Drug Analysis	215
8.13. Innovations in Solid-Phase Extraction for Drug Analysis	218
Suggested Reading	218
References	220
CHAPTER 9 FOOD AND NATURAL PRODUCTS	223
9.1. Liquefying and Extraction of Food Products	223
9.1.1. Sample Preparation	223
9.1.2. Choosing an Extraction Solvent	227
9.2. Removing Matrix Interferences in Foods	228
9.2.1. Fats, Oils, and Lipids	228
9.2.2. Proteins and Meat	228
9.2.3. Carbohydrates, Polysaccharides, and Salts	228
9.2.4. Beverages	229
9.3. Examples of Analyte Isolation from Food Using Solid-Phase Extraction	229
9.3.1. Atrazine from Corn Oil	229
9.3.2. Beverages: Organic Acids and Anthocyanins from Wine	230
9.3.3. Tetracycline Antibiotics in Meat	232
9.3.4. Fumonisin B, in Rodent Feed	233
9.3.5. Vitamin K, in Food	235
9.3.6. α -Tomatine in Tomatoes	236
9.3.7. Wine Flavor Components	237
9.3.8. Solid-Phase Microextraction for Flavor Analysis	237

9.3.9.	Geosmin in Catfish	238
9.3.10.	Folic Acid in Cabbage	240
	Suggested Reading	241
	References	241
CHAPTER 10	AUTOMATION OF SOLID-PHASE EXTRACTION	243
10.1.	Why Automate Solid-Phase Extraction?	243
10.2.	Automation Equipment	244
10.2.1.	Semiautomated Solid-Phase Extraction	245
10.2.2.	Workstations	246
10.2.3.	Total Automation	264
10.3.	Automating a Manual Solid-Phase Extraction Method	266
10.4.	Process of Automation	266
10.4.1.	The Initial Experiment	266
10.4.2.	Minimize Interferences	267
10.4.3.	Optimize Recovery	268
10.4.4.	Column Drying	269
10.4.5.	Reduce Carryover	270
10.4.6.	Optimize Throughput	271
10.5.	Examples of Automated Solid-Phase Extraction	272
10.5.1.	Phenylurea Herbicides in Water	272
10.5.2.	Triazine Herbicides in Water	274
10.5.3.	Cocaine in Urine	277
10.6.	Conclusions	277
	Suggested Reading	278
	References	279
CHAPTER 11	SOLID-PHASE EXTRACTION DISKS	281
11.1.	Introduction	281
11.2.	"Free" Disk Format	282
11.2.1.	Empore Disk	282
11.2.2.	SPEC Disc	284
11.2.3.	Speedisk	285
11.2.4.	Novo-Clean Disk	286
11.2.5.	MemSep	287

11.3. Syringe Disk Format	287
11.4. How to Use a Solid-Phase Extraction Disk	288
11.4.1. Manifold and Hardware for Disk Extraction	288
11.5. Disk Automation	291
11.6. Examples of Disk Methods	293
11.6.1. Polynuclear Aromatic Hydrocarbons from Water	293
11.6.2. Extraction of Polychlorinated Biphenyls from Water	293
11.6.3. EPA Method 552.1: Haloacetic Acids and Dalapon in Drinking Water	294
11.6.4. References for Further Environmental Methods Development	294
11.7. Theory of Disk Operation	295
11.8. New Technology with Disks	297
11.8.1. Disk Derivatization	297
11.8.2. Sample Preservation on Disk	298
11.8.3. Pipette-Tip Extraction Disk	299
Suggested Reading	300
References	301
CHAPTER 12 NEW TECHNOLOGY IN SOLID-PHASE EXTRACTION	303
12.1. Solid-Phase Microextraction	303
12.1.1. Design	303
12.1.2. Theory	305
12.1.3. Examples of Solid-Phase Microextraction	306
12.2. Matrix Solid-Phase Dispersion	309
12.3. New Solid Phases	311
12.3.1. Graphitized Carbon	311
12.3.2. Functionalized Styrene–Divinylbenzene	312
12.3.3. Restricted-Access Sorbents	315
12.3.4. Affinity Solid-Phase Extraction	319
12.3.5. Molecular Recognition and Molecular- Imprinting Solid-Phase Extraction	321
12.3.6. Layered Sorbents	322
12.4. Small-Volume Solid-Phase Extraction	323

12.5. Derivatization on Solid-Phase Extraction Sorbents	323
12.6. Semipermeable Membrane Device	324
12.7. Future of Solid-Phase Extraction	326
Suggested Reading	327
References	328
APPENDIX	
SOLID-PHASE EXTRACTION ON THE INTERNET AND PRODUCT GUIDE	331
A.1. Web Sites	331
A.2. Product Guide	333
INDEX	339
