

CONTENTS

PREFACE	ix
CHAPTER 1 INTRODUCTION	
1.1. Single- and Multiple-Wavelength PA Spectroscopies	2
1.2. Scope	3
1.3. Other Sources of Information	4
CHAPTER 2 EVOLUTION OF PHOTOACOUSTIC INFRARED SPECTROSCOPY	7
2.1. Early History	8
2.2. Multiple-Wavelength PA Infrared Spectroscopy	11
2.3. Arrival of PA FTIR Spectroscopy	17
CHAPTER 3 EXPERIMENTAL METHODS	27
3.1. PA Infrared Spectroscopy with Dispersive Spectrometers	27
3.2. Rapid-Scan PA FTIR Spectroscopy	30
3.3. Step-Scan PA FTIR Spectroscopy	32
3.4. Photothermal Beam Deflection Spectroscopy	34
3.5. Reverse Mirage Spectroscopy	37
3.6. Piezoelectric Detection	41
3.7. Optothermal Window Spectroscopy	47
CHAPTER 4 DEPTH PROFILING	55
4.1. Amplitude Modulation	58
4.2. Phase Modulation	62
4.3. Generalized Two-Dimensional Correlation	70

CHAPTER 5	NUMERICAL METHODS	81
	5.1. Normalization of PA Infrared Spectra	81
	5.2. Linearization of Spectra	89
	5.3. Phase Analysis	93
CHAPTER 6	APPLICATIONS OF PA INFRARED SPECTROSCOPY	101
	6.1. Carbons	101
	6.2. Coals	116
	6.3. Hydrocarbons	126
	6.4. Hydrocarbon Fuels	131
	6.5. Corrosion	138
	6.6. Clays and Clay Minerals	141
	6.7. Wood and Paper	152
	6.8. Polymers	160
	6.9. Gases	165
	6.10. Food Products	176
	6.11. Biology and Biochemistry	187
	6.12. Medical Applications	191
	6.13. Carbonyl Compounds	199
	6.14. Textiles	202
	6.15. Catalysts	209
CHAPTER 7	QUANTITATIVE ANALYSIS	235
	7.1. Quantitation in PA Near-Infrared Spectroscopy	235
	7.2. Quantitation in PA Mid-Infrared Spectroscopy	236
	7.3. Quantitative Analysis at Higher Concentrations	241
CHAPTER 8	SPECIAL TOPICS	245
	8.1. PA Infrared Microspectroscopy	245
	8.2. Synchrotron PA Infrared Spectroscopy	249
APPENDIX 1	GLOSSARY	255
APPENDIX 2	LITERATURE GUIDE	257
AUTHOR INDEX		321
SUBJECT INDEX		333
