

CONTENTS OF VOLUME 1

INTRODUCTION TO THE SERIES	v
CONTRIBUTORS TO VOLUME 1	vii
An Outline of the History of Analytical Methods Based on Complex Formation	1
<i>F. Szabadvry and M. T. Beck</i>	
References	13
Xylenol Orange and Methylthymol Blue as Chromogenic Reagents	15
<i>B. Buděšínský</i>	
I. Introduction	15
II. Synthesis of Xylenol Orange	16
III. Synthesis of Methylthymol Blue	17
IV. Reactions of Xylenol Orange and Methylthymol Blue with Hydrogen Ion and Metal Ions	18
V. Determination of Individual Elements by Means of Xylenol Orange and Methylthymol Blue	25
VI. Remarks on the Present Status of Xylenol Orange and Methylthymol Blue and Related Reagents	42
References	44
Chelating Ion-Exchange Resins	49
<i>E. Blasius and B. Brozio</i>	
I. General Remarks on Complexing Ion Exchangers	50
II. Introduction to Theory	51
III. Synthesis of Chelating Resins	54
IV. Ligand Atoms in Known Chelating Resins	58
V. Chelating Ion Exchangers with Nitrogen the Sole Donor Atom	58
VI. Chelating Ion Exchangers with Nitrogen and Oxygen as Donor Atoms	59
VII. Chelating Ion Exchangers with Nitrogen and Sulfur as Donor Atoms	65

VIII. Chelating Ion Exchangers with Oxygen the Sole Donor Atom	65
IX. Chelating Ion Exchangers with Sulfur the Sole Donor Atom	67
X. Review Literature	68
XI. Synthesis and Analytical Applications of Some Chelating Resins	68
XII. Summary	74
References	75
Conductometric and High-Frequency Impedimetric Titrations Involving Chelates and Chelating Agents	81
<i>F. Vydra and K. Štulík</i>	
I. Conductometric Titrations	81
II. High-Frequency Impedimetric Titrations	93
References	103
The Thermal Dissociation of Chelating Agents and Chelates of Analytical Interest	107
<i>Wesley W. Wendlandt</i>	
I. Introduction	107
II. 8-Quinololinol and Substituted 8-Quinololinol Chelates	108
III. β -Diketone Chelates	124
IV. Rare-Earth Metal Oxalates	132
V. Metal Cupferrates and Neocupferrates	135
VI. Salicylaldehyde Chelates	137
VII. Pyridine- and Quinolinecarboxylic Acid Chelates	139
VIII. Chelates of (Ethylenedinitrilo)tetraacetate and Derivatives	140
IX. Some Miscellaneous Chelates	141
References	142
Chelates in Inorganic Polarographic Analysis: Fundamentals	145
<i>M. Kopanica, J. Doležal, and J. Zýka</i>	
I. Survey of Various Possibilities for the Application of Chelating Agents in Polarographic Analysis	146
II. Theory of the Wave Shift Due to Chelation	148
III. Substitution Reactions of Chelates	154
IV. Mixed-Ligand Complexes	162
V. Adsorption Phenomena at the Dropping-Mercury Electrode	164
VI. Polarographic Waves of Chelating Agents	168
VII. Organic and Mixed Solvents	169
VIII. Structure and Polarographic Behavior of Chelates	171
References	174

Chelates in Inorganic Polarographic Analysis: Applications 179*M. Kopanica, J. Doležal, and J. Zýka*

I. Introduction	183
II. Aluminum: Determination in Minerals	188
III. Arsenic	190
IV. Bismuth	190
V. Cadmium: Determination in Metallic Indium	195
VI. Calcium	196
VII. Cerium: Determination in Inorganic Raw Materials	198
VIII. Chromium	200
IX. Cobalt	202
X. Copper	205
XI. Gallium	212
XII. Germanium	213
XIII. Gold	215
XIV. Indium	216
XV. Iron	218
XVI. Lead	222
XVII. Magnesium	226
XVIII. Manganese	226
XIX. Molybdenum	231
XX. Nickel	235
XXI. Niobium	237
XXII. Palladium	238
XXIII. Platinum	239
XXIV. Potassium	239
XXV. Silver	240
XXVI. Sodium	241
XXVII. Tellurium	242
XXVIII. Thallium	243
XXIX. Thorium: Determination via Replacement Reaction with Lead-EDTA Complex	245
XXX. Tin	246
XXXI. Titanium	248
XXXII. Tungsten	251
XXXIII. Uranium	251
XXXIV. Vanadium: Determination in Mineral Raws	255
XXXV. Zinc	256
XXXVI. Zirconium	259
References	259

**Chelates and Chelating Agents in the Analytical Chemistry
of Molybdenum and Tungsten 265***Richard Püschel and Erik Lassner*

PART A. MOLYBDENUM	267
I. Molybdenum in Aqueous Solution	267

II. Chelation of Molybdenum	272
III. Molybdenum Chelates with Oxygen the Only Donor Atoms	274
IV. Molybdenum Chelates with Sulfur and Oxygen as Donor Atoms	299
V. Molybdenum Chelates with Sulfur the Only Donor Atoms	304
VI. Molybdenum Chelates with Oxygen and Nitrogen as Donor Atoms	311
VII. Molybdenum Chelates with Sulfur and Nitrogen as Donor Atoms	326
VIII. Molybdenum Chelates with Selenium and Nitrogen as Donor Atoms	328
IX. Molybdenum Chelates with Nitrogen the Only Donor Atoms	328
PART B. TUNGSTEN	329
I. Tungsten in Aqueous Solution	329
II. Chelation of Tungsten	332
III. Tungsten Chelates with Oxygen the Only Donor Atoms	333
IV. Tungsten Chelates with Sulfur and Oxygen as Donor Atoms	342
V. Tungsten Chelates with Sulfur the Only Donor Atoms	342
VI. Tungsten Chelates with Oxygen and Nitrogen as Donor Atoms	344
VII. Tungsten Chelates with Selenium and Nitrogen as Donor Atoms	347
