EDTA AND OTHER AMINOPOLYCARBOXYLIC ACIDS AS CHROMOGENIC AGENTS	1
<i>F. BERMEJO-MARTINEZ</i>	
Part A. The Basis of the Chromogenic Use of Chelons	
I. Fundamentals of the Absorption Spectra of Colored Chelonates	1
II. Formation of Chelonates	13
III. Ternary Metal-Chelon-Peroxide Complexes	17
IV. Ternary Metal-Chelon-Ligand Complexes	26
V. Resolution Possibilities When More Than One Metal is Present	28
VI. Chelonates in Nonaqueous Solution	
Part B. Application of EDTA and Other Chelons in the Photometric Determination of Elements (and Amines and Anions)	33
I. General Considerations and Remarks	33
II. Beryllium	36
III. Bismuth	37
IV. Cadmium	39
V. Cerium	40
VI. Chromium	43
VII. Cobalt	61
VIII. Copper	71
IX. Hafbium	81
X. Indium	81
XI. Iridium	81
XII. Iron	83
XIII. Lead	102
XIV. Manganese	103
XV. Molybdenum	105
XVI. Nickel	106

XVII.	Niobium	111
XVIII.	Oxygen	113
XIX.	Palladium	114
XX.	Potassium	116
XXI.	Rare Earths	117
XXII.	Ruthenium	118
XXIII.	Silver	120
XXIV.	Thorium	120
XXV.	Titanium	121
XXVI.	Uranium	124
XXVII.	Vanadium	125
XXVIII.	Zirconium	133
XXIX.	Amines	134
XXX.	Anions	134
Part C.	Photometric Determination of EDTA Using Metal Complexes	135
Part D.	Chelons as Chromogenic Agents in Qualitative Analysis	144
I.	Detection of Metals	144
II.	Detection of Chelons	146
	References	150
AROMATIC ORTHO-DIHYDROXY COMPOUNDS AS REAGENTS FOR INORGANIC ANALYSIS		163
	<i>B. W. BUDEŠÍNSKÝ AND KEITH E. CURTIS</i>	
I.	Introduction	163
II.	Pyrocatechol	168
III.	Pyrocatechuic Aldehyde	179
IV.	Protocatechuic Aldehyde	179
V.	Pyrocatechuic Acid	181
VI.	Protocatechuic Acid	181
VII.	Tiron	183
VIII.	Epinephrine	192
IX.	Azo Derivatives of Pyrocatechol	193
X.	Bisazo Derivatives of 2,2'-Stilbenedisulfonic Acid	193
XI.	Stilbazo	194
XII.	Stilbazogall I	197
XIII.	Stilbazogall II	198
XIV.	Pyrogallol	199
XV.	Hydroxyhydroquinone	206
XVI.	Pyrogallolcarboxylic Acid	207
XVII.	Gallic Acid	208
XVIII.	Pyrogallolsulfonic Acid	212
XIX.	3,4,5-Trihydroxybenzenesulfonic Acid	213

XX.	Pyrogallol-m-disulfonic Acid	214
XXI.	Tetrahydroxy-p-benzoquinone	215
XXII.	1,2-Naphthalenediol	215
XXIII.	2,3-Naphthalenediol	215
XXIV.	6,7-Dihydroxy-2-naphthalenesulfonic Acid	218
XXV.	6,7-Dihydroxy-5-(2-pyridylazo)-2-naphthalenesulfonic Acid (PADNS)	220
XXVI.	Naphthoquinones	221
XXVII.	Isonaphthazarin	221
XXVIII.	Naphthazarin	221
XXIX.	6,7-Dihydroxy-1,4-naphthoquinone	222
XXX.	Gossypol	222
XXXI.	Benzopyrilium Compounds	222
XXXII.	Dihydroxycoumarins	223
XXXIII.	Esculetin	224
XXXIV.	4-Methylesculetin	225
XXXV.	4-Phenylesculetin	226
XXXVI.	Daphnetin	226
XXXVII.	Methyl daphnetin	226
XXXVIII.	4-Phenyl daphnetin	227
XXXIX.	Flavones and Flavanones	227
XL.	Norwogonium	228
XLI.	Kaemferol	228
XLII.	Robinetin	228
XLIII.	Quercetin	228
XLIV.	Quercetinsulfonic Acid	233
XLV.	Dihydroquercetin	235
XLVI.	3,3',4',7,8-Pentahydroxyflavone	235
XLVII.	Alizarin	236
XLVIII.	Quinalizarin	236
XLIX.	1,4,5,8-Tetrahydroxyanthraquinone	240
L.	Carminic Acid	240
LI.	9-Substituted Fluorones	241
LII.	Methylfluorone	242
LIII.	Phenylfluorone	244
LIV.	Nitrophenylfluorones	249
LV.	o-Nitrophenylfluorone	250
LVI.	p-Nitrophenylfluorone	250
LVII.	"Dimethylfluorone"	251
LVIII.	"Diethylfluorone"	252
LIX.	o-Hydroxyphenylfluorone	253
LX.	Salicylfluorone	253
LXI.	Disulfophenylfluorone	254
LXII.	Pyridylfluorone	254
LXIII.	Hydroxynaphthylfluorone	255
LXIV.	Anthrylfluorone	255
LXV.	Hematoxylin	255
LXVI.	Metallochromic Indicators	257
LXVII.	Selection of Reagents for Individual Metals	259
LXVIII.	Conclusion and Future Prospects	259
	References	274
