Chapter 1	Introduction to Green Chemistry	1
Chapter 2	Concepts and Trends in Green Analytical Chemistry	18
2.1	The Role of Analytical Chemistry	20
2.1.1	Field Analysis	25
2.1.2	Screening	33
2.1.3	Monitoring	44
2.2	The Role of Instrumental Methods and Automation in the Greening of Analysis	53
2.3	Assessment of Analytical Methodologies	65
2.3.1	Parameters for Assessment	66
2.3.2	Use of Life Cycle Analysis	71
Chapter 3	“Greening” Sample Treatment	77
3.1	Introduction to Environmentally Benign Sample Treatment	79
3.2	Reduced and Solvent-Free Sample Preparation Methodologies	82
3.2.1	Solventless Methods	84
3.2.2	Solvent Microextraction	89
3.2.3	Sorption Microextraction	96
3.2.4	Thermal Desorption	105
3.3	Alternative Solvents	110
3.3.1	Supercritical Fluids	118
3.3.2	Ionic Liquids	124
3.4	Energy Saving Procedures	132
3.4.1	Microwaves	136
3.4.2	Ultrasound	142

Green Analytical Chemistry

Chapter 4	Green Instrumental Analysis	153
4.1	Assessment of Analytical Methods for “Greenness”	153
4.2	Greening Flow Injection Analysis	154
4.3	Chemical Sensors	158
4.3.1	Surface Acoustic Wave Sensors	160
4.3.2	Surface Plasmon Resonance Sensors	161
4.3.3	Microelectrode Sensor Arrays	163
4.3.4	Bioanalytical Methods (Immunoassay Techniques)	167
4.4	Spectroscopic Methods	167
4.4.1	Transforming Spectroscopy to Green Analytical Chemistry through Simplification and Portability	168
4.4.2	Fluorescence Excitation Emission Matrix Spectroscopy	178
4.4.3	Chemical Analysis with Consumer Electronics	184
Chapter 5	Separation Methods in Analytical Chemistry	208
5.1	Gas Phase Separations	208
5.2	Liquid Phase Separations	210
5.2.1	Liquid Green Chromatography	210
5.2.2	Capillary Electrophoresis	244
5.2.3	Micronization of Separation Methods	254
5.3	New versus Refurbished Instrumentation: the Life Cycle of an Instrument	276
Chapter 6	Greening Analytical Chemistry by Improving Signal Acquisition and Processing	289
6.1	Chemometrics and Processing Analytical Results	290
6.1.1	EEM Spectroscopy and Chemometrics	292
6.2	Quantitative Structure–Property Relationship (QSPR)	296
6.3	Improving the Performance of Flow Techniques by Computerized Multiple-Input	300
Chapter 7	Conclusions	304
	Subject Index	306
