Contents

1 Introduction 1
References 6

2 Types of Errors in Instrumental Analysis 7
2.1 Overview 7
2.2 Random Errors 10
2.2.1 Distribution of Measured Values 10
2.2.2 Standard Deviation 16
2.2.3 Confidence Interval 19
2.2.4 Confidence Interval and Quality 22
2.2.5 Propagation of Errors 26
References 35

3 Statistical Tests 37
3.1 General Remarks 37
3.2 Tests for Series of Measurements 39
3.2.1 Rapid Test for Normal Distribution (David Test) 40
3.2.2 Test for a Trend 40
3.2.3 Test for Outliers 43
3.3 Comparison of Two Standard Deviations 51
3.4 Comparison of More than Two Standard Deviations 56
3.5 Comparison of Two Mean Values 59
3.6 Comparison of More than Two Mean Values: Analysis of Variance 67
References 76

4 General Aspects of Linear Regression 79
4.1 Correlation, Regression, and Calibration 79
4.2 Linear Calibration Model 83
4.3 Simplification of the Linear Calibration Function 100
4.4 Quadratic Regression Analysis 103

4.5 Working Range and Calibration Standards 108
References 116

5 Validation of Method Performance 117
5.1 General Remarks 117
5.2 Precision 118
5.3 Linearity of Calibration Lines 132
5.3.1 General Remarks 132
5.3.2 Quality Coefficient 132
5.3.3 Visual Examinations 134
5.3.4 Mandel Test 136
5.3.5 The Lack-of-Fit Test by ANOVA 138
5.3.6 Test of the Significance of the Quadratic Regression Coefficient a_2 143
5.4 Test for Outliers in the Linear Regression Function 146
5.5 Homogeneity of Variances 155
5.6 Weighted Linear Least Squares Regression 160
5.7 Tests for Trueness 166
5.7.1 Systematic Errors in the Least Squares Regression Procedure 166
5.7.2 Mean Value *t*-Test 167
5.7.3 Recovery Rate 169
5.7.4 Recovery Rate of Stocked Samples 172
5.7.5 Recovery Function 174
5.7.6 Standard Addition Procedure 179
5.7.7 Test by Method Comparison 184
5.7.8 Standard Addition Method 202
5.8 Limit of Detection and Limit of Quantification 206
5.9 Robustness, Ruggedness 218
5.10 Application of Method Validation 226
References 237

6 Aspects of Method Development 241
6.1 General Remarks 241
6.2 Selectivity and Specificity 247
6.3 Method Development of Headspace Gas Chromatography 251
References 267

7 Performance Verification of Analytical Instruments and Tools: Selected Examples 269
7.1 General Remarks on Qualification and Performance Verification of Laboratory Instruments 269
7.2 UV–Vis Spectrophotometers 270
7.2.1 Wavelength Accuracy 270
7.2.2 Stray Light 271

7.2.3 Resolution 272
7.2.4 Photometric Accuracy 273
7.3 HPLC Instruments 279
7.4 Balances 284
References 285

8 Control Charts in the Analytical Laboratory 287
8.1 Quality Control 287
8.2 Shewhart Charts 288
8.3 CuSum Charts 298
References 304

9 Interlaboratory Studies 305
9.1 Purpose and Types of Interlaboratory Studies 305
9.2 Method Performance Studies 306
9.3 Proficiency Testing 312
References 317

10 Measurement Uncertainty 319
10.1 Purpose, Definitions, and Terminology 319
10.2 Steps in Measurement Uncertainty Estimation 321
10.3 Spreadsheet Method for Uncertainty Calculation 325
10.4 Procedure of the Nordtest Report 333
References 342
