543 TRA

CONTENTS

1. Statistics: A Child of Our Time? 1
2. Sampling for Chemical Analysis of the Environment: Statistical Considerations 5
3. Sampling and Variance in Measurements of Trifluralin Disappearance from a Field Soil 25
4. Processing Outliers in Statistical Data 37
5. The Many Dimensions of Detection in Chemical Analysis with Special Emphasis on the One-Dimensional Calibration Curve 49
6. Introduction to the Theory of Correlation Chromatography 83
7. Developments in Correlation Chromatography: Application in Trace Analysis 101
8. Calibration-Curve Based Analysis: Use of Multiple-Curve and Weighted Least-Squares Procedures with Confidence Band Statistics 115
9. The Linear Calibration Graph and Its Confidence Bands from Regression on Transformed Data 133
10. Use of Cubic Spline Functions in Solving Calibration Problems 167
11. Comparison of Calibration Graph Amount and Estimated Amount Intervals Calculated from Three Research Methods 183
12. Application of Soft Independent Method of Class Analogy (SIMCA) in Isomer Specific Analysis of Polychlorinated Biphenyls 195
13. From Data to Information to Knowledge: The Problems of Metamorphosis 235
