

## Contents

<i>Preface</i> . . . . .	11
<i>Preface to the English Edition</i> . . . . .	13
<i>Contents</i> . . . . .	15
<i>List of abbreviations and symbols</i> . . . . .	19
<i>List of equilibrium constants</i> . . . . .	23
1. ACID-BASE THEORIES . . . . .	27
1.1. Earliest concepts . . . . .	27
1.2. The Franklin theory of solvosystems of compounds . . . . .	29
1.2.1. Aqueous system of acids, bases, and salts . . . . .	29
1.2.2. Hydrogen sulphide system of acids, bases, and salts . . . . .	30
1.2.3. Ammonia system of acids, bases, and salts . . . . .	31
1.2.4. Other systems . . . . .	34
1.3. The <b>Brønsted-Lowry</b> proton theory . . . . .	35
1.4. The Lewis electron theory . . . . .	41
1.5. Other theories . . . . .	47
1.6. Evaluation of acid-base theories . . . . .	47
2. SOLVENTS . . . . .	51
2.1. Classification and essential properties of solvents . . . . .	51
2.2. Acidity scales in organic solvents . . . . .	61
2.2.1. Standard acidity scale . . . . .	62
2.2.2. Conventional acidity scale . . . . .	65
2.2.3. Operational acidity scale . . . . .	66
2.2.4. Absolute (thermodynamic) acidity scale . . . . .	75
2.2.4.1. Effect of relative permittivity on transfer activity coefficient . . . . .	78
2.2.4.2. Estimation of $\log {}_i f_i$ from consequences of Born equation . . . . .	80
2.2.4.3. Estimation of $\log {}_i f_i$ by use of standard electrolytes . . . . .	86
	15

2.2.4.4.	Estimation of $\log f_b$ from equilibrium and reaction rate constants . . .	88
2.2.4.5.	Absolute electrode potential . . . . .	93
2.2.4.6.	Other approximations of $\log f_H$ . . . . .	96
2.2.4.7.	Significance of absolute acidity scale . . . . .	98
2.2.5.	Empirical acidity scale . . . . .	100
3.	<b>ACID AND BASE STRENGTH IN NONAQUEOUS SOLVENTS . . . . .</b>	<b>111</b>
3.1.	Dissociation constant . . . . .	111
3.2.	Amphiprotic polar solvents . . . . .	113
3.2.1.	Effect of relative permittivity on acid and base strength . . . . .	125
3.3.	Aprotic polar solvents . . . . .	131
3.4.	Amphiprotic nonpolar solvents . . . . .	148
3.4.1.	Presence of two bases and effect of water . . . . .	156
3.4.2.	Analytical consequences of association . . . . .	161
3.5.	<b>Aprotic nonpolar solvents . . . . .</b>	<b>168</b>
3.6.	Main acidobasic equilibria and their effects . . . . .	184
3.6.1.	Diagnostics of equilibria . . . . .	185
3.6.2.	Equilibria and potentiometric titration curve . . . . .	189
4.	<b>CHOICE AND PURIFICATION OF SOLVENTS . . . . .</b>	<b>209</b>
4.1.	Choice of solvent . . . . .	209
4.2.	Purification of solvents . . . . .	217
5.	<b>TITRANTS AND PRIMARY STANDARDS . . . . .</b>	<b>237</b>
5.1.	<b>Acid titrants . . . . .</b>	<b>237</b>
5.1.1.	Perchloric acid titrants . . . . .	237
5.1.2.	Hydrochloric acid titrant . . . . .	240
5.1.3.	Nitric acid titrant . . . . .	241
5.1.4.	Tosylic acid titrant . . . . .	241
5.2.	<b>Base titrants . . . . .</b>	<b>242</b>
5.2.1.	Alkali metal hydroxides . . . . .	242
5.2.2.	Alkali metal methoxides . . . . .	244
5.2.3.	Quaternary ammonium hydroxides . . . . .	246
5.2.3.1.	Silver oxide method of preparation . . . . .	246
5.2.3.2.	Ion exchange method of preparation . . . . .	250
5.2.3.3.	Potassium hydroxide method of preparation . . . . .	251
5.2.4.	Other titrants . . . . .	251
5.3.	<b>Oxidation-reduction titrants . . . . .</b>	<b>253</b>

5.4.	Primary standards for standardization of acids . . . . .	254
5.5.	Primary standards for standardization of bases . . . . .	256
6.	INDICATION OF TITRATION END-POINT . . . . .	259
6.1.	Potentiometric indication . . . . .	259
6.1.1.	Indicator electrodes . . . . .	261
6.1.1.1.	Glass electrode . . . . .	262
6.1.1.2.	Metallic electrodes . . . . .	264
6.1.1.2.1.	Bimetallic electrode systems . . . . .	265
6.1.1.3.	Graphite electrodes . . . . .	265
6.1.1.4.	Ion selective electrodes . . . . .	266
6.1.2.	Reference electrodes . . . . .	267
6.1.2.1.	Calomel electrode . . . . .	267
6.1.2.2.	Silver—silver chloride electrode . . . . .	268
6.1.2.3.	Other electrodes . . . . .	269
6.1.2.4.	Indicator electrodes serving as reference electrodes . . . . .	269
6.1.3.	Salt bridges . . . . .	270
6.1.4.	Anomalous courses of potentiometric curves . . . . .	270
6.2.	Visual indication . . . . .	275
6.2.1.	Theory . . . . .	277
6.2.2.	Indicators for titrations of bases . . . . .	283
6.2.3.	Indicators for titrations of acids . . . . .	284
6.3.	Photometric indication . . . . .	286
6.4.	Conductometric indication . . . . .	296
6.5.	High-frequency indication . . . . .	299
6.6.	Thermometric indication . . . . .	302
6.7.	Coulometric titrations and other end-point indications . . . . .	307
7.	METHODOLOGY OF TITRATIONS . . . . .	313
7.1.	Titration technique . . . . .	313
7.2.	Application to pharmaceutical preparations . . . . .	314
8.	ACID-BASE TITRATIONS . . . . .	319
8.1.	Organic acids and their functional and substitution deriva- tives . . . . .	319
8.1.1.	Acids and phenols . . . . .	319
8.1.1.1.	Titrations in protophilic solvents . . . . .	322
8.1.1.2.	Titrations in aprotic solvents . . . . .	330
8.1.1.3.	Titrations in amphiprotic solvents . . . . .	335
8.1.2.	Acyl halides . . . . .	342

8.1.3.	Carboxylic acid anhydrides . . . . .	343
8.1.4.	Esters . . . . .	347
8.1.5.	Amides . . . . .	349
8.1.6.	Hydrazides . . . . .	354
8.1.7.	Barbiturates . . . . .	357
8.1.8.	Amino acids . . . . .	361
8.2.	Alcohols . . . . .	366
8.3.	Aldehydes and ketones . . . . .	370
8.3.1.	Schiff's bases . . . . .	374
8.4.	Sulphur compounds . . . . .	376
8.4.1.	Thiols, sulphides, and others . . . . .	376
8.4.2.	Sulphonamides . . . . .	378
8.5.	Enols and imides . . . . .	383
8.6.	Amines . . . . .	387
8.6.1.	Microtitrations of amines . . . . .	391
8.6.2.	Mixtures of amines . . . . .	392
8.7.	Heterocyclic compounds . . . . .	405
8.7.1.	Pyrazolone derivatives . . . . .	405
8.7.2.	Phenothiazine derivatives . . . . .	408
8.8.	Alkaloids . . . . .	411
8.9.	Antibiotics . . . . .	430
8.10.	Vitamins and hormones . . . . .	434
8.11.	Synthetic polymers . . . . .	436
8.12.	Salts . . . . .	438
8.13.	Inorganic acids . . . . .	451
8.14.	Gases . . . . .	456
9.	OXIDATION-REDUCTION TITRATIONS . . . . .	459
10.	DETERMINATIONS OF MOLECULAR MASSES OF COMPOTJNDS . . . . .	465
10.1.	Aldehydes and ketones . . . . .	466
10.2.	Alcohols . . . . .	467
10.3.	Amines . . . . .	468
10.4.	Diakyl sulphides . . . . .	469
10.5.	Carboxylic acids . . . . .	470
	Nonaqueous solvents and their constants . . . . .	473
	Official drugs and their dosage forms assayed by nonaqueous titration	483
	Index . . . . .	519
