Editor's Preface . . . . .	XV
Authors' Preface . . . . .	XVII
Chapter 1. GENERAL CHARACTERISTICS OF PRE- CONCENTRATION . . . . .	1
1.1. Concentration and separation . . . . .	1
1.2. Significance of preconcentration and fields of application . . . . .	3
1.3. Quantitative characteristics of preconcentration . . . . .	5
1.4. Selective and group preconcentration . . . . .	7
1.5. Removal of matrix and separation of trace elements . . . . .	9
References. . . . .	10
Chapter 2. METHODS OF PRECONCENTRATION . . . . .	11
2.1. Classification and general characteristics of methods . . . . .	11
2.2. Solvent extraction . . . . .	15
2.2.1. Characteristics of solvent extraction as a method of preconcentration . . . . .	15
2.2.2. Extraction of trace elements . . . . .	19
2.2.2.1. Chelates . . . . .	19
2.2.2.2. Neutral coordinatively solvated compounds. . . . .	26
2.2.2.3. Ionic associates. . . . .	31
2.2.3. Extraction of matrix . . . . .	34
2.2.4. Extraction concentration techniques . . . . .	37
2.2.5. Extraction chromatography. . . . .	40
2.2.6. Automation . . . . .	44
2.3. Sorption methods . . . . .	45
2.3.1. General characteristics of methods . . . . .	45
	IX

2.3.2.	Activated charcoals . . . . .	51
2.3.3.	Synthetic ion exchangers. . . . .	57
2.3.4.	Complex-forming sorbents . . . . .	62
2.3.4.1.	Complex-forming sorbents with inoculated groups. . . . .	62
2.3.4.2.	Polymeric heterochain sorbents . . . . .	69
2.3.4.3.	Sorbents modified with complex-forming reagents. . . . .	73
2.3.5.	Inorganic sorbents. . . . .	74
2.3.6.	Automating the sorption concentration process. . . . .	75
2.4.	Precipitation and co-precipitation methods . . . . .	79
2.4.1.	Precipitation . . . . .	80
2.4.1.1.	Matrix precipitation . . . . .	80
2.4.1.2.	Precipitation of trace elements. . . . .	81
2.4.2.	Co-precipitation of trace elements. . . . .	81
2.4.2.1.	General . . . . .	81
2.4.2.2.	Inorganic co-precipitants . . . . .	85
2.4.2.3.	Organic co-precipitants . . . . .	87
2.5.	Electrochemical methods . . . . .	94
2.5.1.	Electrodeposition . . . . .	94
2.5.2.	Electrodeposition as part of stripping voltammetry. . . . .	102
2.5.3.	Other electrochemical methods . . . . .	106
2.5.3.1.	Cementation . . . . .	106
2.5.3.2.	Preconcentration using mercury as chemical reagent . . . . .	108
2.5.3.3.	Electrodissolution . . . . .	109
2.5.3.4.	Electrodialysis . . . . .	111
2.5.3.5.	Electroosmosis . . . . .	113
2.5.3.6.	Electrophoresis. . . . .	114
2.5.3.7.	Electrodifffusion . . . . .	115
2.6.	Evaporation methods. . . . .	116
2.6.1.	Evaporation. . . . .	116
2.6.2.	Sublimation . . . . .	121
2.6.3.	Volatilization after chemical transformations . . . . .	122
2.6.3.1.	Mineralization of organic and biological samples . . . . .	122
2.6.3.2.	Volatilization of inorganic compounds with preliminary chemical transformation . . . . .	128
2.7.	Controlled crystallization . . . . .	135

2.7.1. Directed crystallization . . . . .	138
2.7.2. Zone melting . . . . .	144
2.8. Pyrometallurgical methods . . . . .	145
2.8.1. Fire assay . . . . .	145
2.8.2. Other pyrometallurgical methods . . . . .	153
2.9. Flotation . . . . .	155
2.9.1. Flotation after co-precipitation . . . . .	157
2.9.2. Ionic flotation . . . . .	157
2.10. Filtration and other related membrane methods . . . . .	160
2.11. Chemical transport reactions . . . . .	165
2.12. Thermodiffusion . . . . .	166
2.13. Combination of preconcentration methods . . . . .	167
2.14. Comparison of preconcentration methods . . . . .	172
References . . . . .	179

Chapter 3. COMBINING PRECONCENTRATION WITH THE  
DETERMINATION METHODS . . . . .

3.1. Combined and hybrid methods . . . . .	205
3.2. Atomic emission spectrometry . . . . .	211
3.2.1. General remarks . . . . .	211
3.2.2. Fractional volatilization . . . . .	214
3.2.3. Other volatilization and related methods . . . . .	216
3.2.4. Extraction . . . . .	219
3.2.5. Sorption methods . . . . .	220
3.2.6. Electrodeposition . . . . .	221
3.2.7. Other concentration methods . . . . .	222
3.3. Atomic absorption spectrometry . . . . .	222
3.3.1. Extraction . . . . .	223
3.3.2. Sorption . . . . .	228
3.3.3. Volatilization and related methods . . . . .	229
3.3.4. Other methods . . . . .	231
3.4. Atomic fluorescence spectrometry . . . . .	233
3.5. Spectrophotometry and fluorimetry . . . . .	235
3.5.1. Extraction . . . . .	236
3.5.2. Other methods . . . . .	239
3.6. X-ray fluorescence spectrometry . . . . .	240
3.6.1. Precipitation and co-precipitation . . . . .	241
3.6.2. Sorption methods . . . . .	242
3.6.3. Extraction . . . . .	244
3.6.4. Other methods . . . . .	245

3.7. Spark-source mass spectrometry . . . . .	246
3.8. Electron spin resonance . . . . .	250
3.8.1. Determination of paramagnetic ions . . . . .	250
3.8.2. Use of spin-labelled reagents . . . . .	251
3.9. Activation analysis . . . . .	254
3.9.1. General remarks . . . . .	254
3.9.2. Preconcentration before irradiation . . . . .	256
3.9.3. Preconcentration after irradiation (radiochemical separation) . . . . .	257
3.9.3.1. Extraction methods . . . . .	258
3.9.3.2. Sorption methods . . . . .	260
3.9.4. Automation . . . . .	262
3.10. Electrochemical methods . . . . .	262
3.10.1. Stripping voltammetry . . . . .	263
3.10.2. Indirect polarographic analysis of extracts . . . . .	264
3.10.3. Other electrochemical methods . . . . .	267
3.11. Catalymetry . . . . .	268
3.12. Chromatographic methods . . . . .	270
3.12.1. Gas chromatography . . . . .	270
3.12.2. High-performance liquid chromatography . . . . .	273
3.13. Other methods . . . . .	274
References . . . . .	276

Chapter 4. PRECONCENTRATION IN ANALYSIS OF VARIOUS SUBSTANCES . . . . .	289
4.1. Environmental samples . . . . .	289
4.1.1. Distinguishing features . . . . .	289
4.1.2. Natural and waste waters . . . . .	291
4.1.3. Air . . . . .	300
4.1.4. Soils and bottom sediments . . . . .	301
4.2. Mineral raw material . . . . .	303
4.3. Metals, alloys and other inorganic substances and materials, including high-purity substances . . . . .	308
4.3.1. General . . . . .	308
4.3.2. Volatilization methods . . . . .	314
4.3.3. Solvent extraction . . . . .	318
4.3.4. Other methods of preconcentration . . . . .	328
4.4. Organic substances and biological samples . . . . .	329
4.4.1. Distinguishing features . . . . .	329
4.4.2. Dry ashing . . . . .	332

4.4.3. Wet ashing . . . . .	334
4.4.4. Other methods of preconcentration . . . . .	336
4.4.5. Combining preconcentration techniques . . . . .	337
References. . . . .	340
Subject Index . . . . .	351
