Volumes in the Series	<i>xix</i>
Foreword	<i>xxiii</i>
Preface	<i>xxix</i>
Series Editor's Preface	<i>xxxi</i>

1. An Introduction to the Basic Principles and Concepts of Mass Spectrometry	1
Kym F. Faull, Alek N. Dooley, Frederic Halgand, Lorelei D. Shoemaker, Andrew J. Norris, Christopher M. Ryan, Arthur Laganowsky, Jodie V. Johnson and Jonathan E. Katz	
1. Opening Remarks	2
2. The Instrument	4
3. Vacuum Systems	4
4. Definitions	5
5. Resolution	6
6. Mass Accuracy	8
7. Isotopes	9
8. Reconciling Theoretical and Measured Masses	11
9. Charge State Assignment	11
10. The Need for Chromatography	12
11. The Myth of Defining Elemental Compositions	13
12. Desorption Ionization: Laser Desorption	14
13. Spray Ionization: Electrospray Ionization	16
14. Mass Analyzers	19
15. Time-of-Flight Mass Spectrometers	20
16. Linear Quadrupole Mass Filters	22
17. Quadrupole Ion Traps	23
18. Linear Ion Traps	26
19. Ion Cyclotron Cells and Fourier Transform Mass Spectrometry	27
20. The Orbitrap	29
21. Detectors	30
22. Electron Multipliers	31
23. Conversion Dynodes or High-Energy Dynodes	32
24. Quantification	32
25. Structural Elucidation by Mass Spectrometry	34

26. Gas Phase Ion Stabilities and Energetics of the Collisionally-Activated Dissociation Process	35
27. Collision-Induced Dissociation	36
28. Electron Capture Dissociation	38
29. Electron Transfer Dissociation	40
30. Scan Modes in Tandem Mass Spectrometry	40
31. Conclusions	43
Acknowledgements	44
References	44
2. Characterization of Protein Higher Order Structure and Dynamics with ESI MS	47
Wendell P. Griffith, Anirban Mohimen, Rinat R. Abzalimov and Igor A. Kaltashov	
1. Introduction	47
2. Charge-State Distributions of Protein Ions in ESI MS and Large-Scale Conformational Dynamics of Single Polypeptide Chains	48
3. Conformational Dynamics in Multi-Component Systems: Assembly of Hemoglobin Tetramers	51
4. Charge-State Distribution and the Estimation of the Solvent-Exposed Surface Areas of Proteins	55
5. Limitations of the Use of Charge-State Distributions for Determining Protein Conformational Heterogeneity	58
6. Future Outlook	59
Acknowledgements	60
References	61
3. Noncovalent Protein Interactions	63
Summer L. Bernstein and Michael T. Bowers	
1. Introduction	63
2. Instrumentation and Technical Development	64
3. Protein Misfolding and Aggregation	67
4. Ligand-Receptor Interactions	74
5. Heterogeneous Complexes: TRAP	76
6. Subunit Exchange of Transthyretin	78
7. Future Directions	78
8. Conclusions	79
Acknowledgments	79
References	79
4. Protein Analysis with Hydrogen-Deuterium Exchange Mass Spectrometry	83
Jennifer L. Mitchell and John R. Engen	
1. Introduction	83
2. Experimental Protocol	88
3. Illustrative Examples	96
4. Conclusions	100
Acknowledgements	101
References	101

5	Biochemical Reaction Kinetics Studied by Time-Resolved Electrospray Ionization Mass Spectrometry	103
	Lars Konernann, Jingxi Pan and Derek J. Wilson	
	1. Introduction	103
	2. Time-Resolved ESI-MS	105
	3. Selected Applications	109
	4. Conclusions and Outlook	120
	Acknowledgements	121
	References	121
6	Thermodynamic Analysis of Protein Folding and Ligand Binding by SUPREX	127
	Michael C. Fitzgerald, Liangjie Tang and Erin D. Hopper	
	1. Introduction	127
	2. The SUPREX Protocol	128
	3. Evaluation of Thermodynamic Parameters	131
	4. Quantitative Analysis of Ligand Binding	136
	5. Unique Applications	141
	6. Conclusion	146
	References	146
7	Microsecond Time-Scale Hydroxyl Radical Profiling of Solvent-Accessible Protein Residues	151
	David M. Hambly and Michael L. Gross	
	1. Introduction	151
	2. Reagents for Surface Mapping	153
	3. Fast Photochemical Oxidation of Proteins (FPOP)	163
	Acknowledgement	172
	References	172
8	Intact Protein Mass Measurements and Top-Down Mass Spectrometry: Application to Integral Membrane Proteins	179
	Julian P. Whitelegge	
	1. Introduction	179
	2. Intact Protein Mass Measurements	180
	3. Ionization	188
	References	194
9	Probing the Structure and Function of Integral Membrane Proteins by Mass Spectrometry	197
	Adam B. Weinglass	
	1. Introduction	197
	2. Technical Aspects of Mass Spectrometry of Integral Membrane Proteins	198
	3. MS of Integral Membrane Proteins Provides Insight into Structure, Function and Mechanism
