Series Editor's Preface	xiii
Preface	xv
<b>1. Introduction to the Analysis of Bioactive Compounds in Marine Samples</b>	<b>1</b>
<i>Teresa Rocha-Santos and Armando C. Duarte</i>	
1.1 Importance of Bioactive Compounds	1
1.2 Sources of Bioactive Compounds	2
1.3 Classes of Bioactive Compounds	5
1.3.1 Polyketides	6
1.3.2 Terpenes	8
1.3.3 Peptides	8
1.3.4 Alkaloids	9
1.3.5 Shikimates	9
1.3.6 Sugars	9
1.4 General Approaches for Screening Bioactive Compounds	10
<b>2. Prospection, Collection, and Preservation of Marine Samples</b>	<b>15</b>
<i>Sara Leston, Margarida Nunes, João Rosa, Marco F.L. Lemos, Fernando Ramos and Miguel A. Pardal</i>	
2.1 Introduction	15
2.2 Bioprospecting in Extreme Environments	17
2.3 Collection of Marine Samples	19
2.4 Sustainable Production of Bioactive Compounds	27
2.5 Preservation of Marine Samples	30
2.6 Final Considerations	30

<b>3. Classical Methodologies for Preparation of Extracts and Fractions</b>	<b>35</b>
<i>C.I.L. Justino, K. Duarte, A.C. Freitas, Armando C. Duarte and Teresa Rocha-Santos</i>	
<b>3.1 Sample Preparation of Bioactive Compounds from the Marine Environment</b>	<b>35</b>
3.1.1 Extraction of Bioactive Compounds	46
3.1.2 Fractionation of Extracts to Obtain Fractions of Increasing Purity in Bioactive Compounds	51
<b>3.2 Final Considerations</b>	<b>54</b>
<b>4. Green Analytical Methodologies for Preparation of Extracts and Analysis of Bioactive Compounds</b>	<b>59</b>
<i>K. Duarte, C.I.L. Justino, A.M. Gomes, Teresa Rocha-Santos and Armando C. Duarte</i>	
<b>4.1 Green Extraction Techniques to Obtain Bioactive Compounds</b>	<b>59</b>
4.1.1 Supercritical Fluid Extraction (SFE)	62
4.1.2 Pressurized Liquid Extraction (PLE)	67
4.1.3 Ultrasound Assisted Extraction (UAE)	68
4.1.4 Microwave Assisted Extraction (MAE)	69
4.1.5 Enzyme Assisted Extraction (EAE)	70
4.1.6 Solid Phase Microextraction (SPME)	72
4.1.7 Solid Phase Extraction (SPE)	73
<b>4.2 Direct Analysis of Untreated Samples to Obtain Bioactive Compounds</b>	<b>75</b>
<b>5. Bioassays for Bioactivity Screening</b>	<b>79</b>
<i>Sofia Isabel G.H.M. Montalvão, Vineeta Singh and Shafiul Haque</i>	
<b>5.1 Introduction</b>	<b>79</b>
<b>5.2 Screening Models</b>	<b>83</b>
5.2.1 Antimicrobial Assays	83
5.2.2 Anticancer Assays	86
5.2.3 Antiviral Assays	89
5.2.4 Anti-Inflammatory Assays	90
5.2.5 Analgesic Assays	91
5.2.6 Antiallergic Activity	92
5.2.7 Diuretic Activity	94
5.2.8 Adaptogenic Assays	95
5.2.9 Immunomodulation Activity	96

5.2.10	Choleretic and Anticholestatic Activities	98
5.2.11	Acute Toxicity and CNS Activities	99
5.2.12	Isolated Tissues	100
<b>5.3</b>	<b>Toxicity Evaluation</b>	<b>100</b>
5.3.1	Reproductive Toxic Evaluation Studies	100
5.3.2	Carcinogenic Evaluation Studies	101
5.3.3	Mutagenic Toxicity Evaluation Studies	101
<b>5.4</b>	<b>Use of Animals</b>	<b>101</b>
<b>5.5</b>	<b>Clinical Trials</b>	<b>102</b>
5.5.1	Definition and Phases of Clinical Trials	102
5.5.2	Status of Marine Bioactive Molecules in Clinical Trials or Market	103
<b>5.6</b>	<b>Conclusions and Future Perspectives</b>	<b>107</b>
<b>6.</b>	<b>Vibrational Spectroscopy for Structural Characterization of Bioactive Compounds</b>	<b>115</b>
	<i>Keisham S. Singh, Mahesh S. Majik and Supriya Tilvi</i>	
<b>6.1</b>	<b>Vibrational Spectroscopy</b>	<b>115</b>
<b>6.2</b>	<b>Introduction to Infrared (IR) and Raman Spectroscopy</b>	<b>117</b>
6.2.1	Fourier Transform IR Spectrometers	118
6.2.2	Analytical Information	118
6.2.3	Functional Groups	119
<b>6.3</b>	<b>Selection Rules in Vibrational Spectroscopy</b>	<b>121</b>
<b>6.4</b>	<b>Structure Characterization by Vibrational Spectroscopy</b>	<b>122</b>
6.4.1	Polysaccharides	123
6.4.2	Amino Acids and Peptides	126
6.4.3	Proteins	127
6.4.4	Alkaloids	130
6.4.5	Terpenes	132
6.4.6	Flavonoids	133
6.4.7	Sterols	134
6.4.8	Siderophores	138
6.4.9	Melanin	140
<b>6.5</b>	<b>Conclusion</b>	<b>141</b>
<b>7.</b>	<b>Nuclear Magnetic Resonance Spectroscopy for Structural Characterization of Bioactive Compounds</b>	<b>149</b>
	<i>Clementina M.M. Santos and Artur M.S. Silva</i>	
<b>7.1</b>	<b>Introduction</b>	<b>149</b>
<b>7.2</b>	<b>Proton Resonances Assignment</b>	<b>150</b>

7.3	Establishment of Carbon Skeleton	155
7.4	Stereochemistry	158
7.5	Hyphenated NMR Techniques	171
7.6	Quantitative NMR	174
7.7	Combined NMR Techniques and Different Families of Compounds	177
7.8	Revised Structures	187
<b>8.</b>	<b>Mass Spectrometry for Determination of Bioactive Compounds</b>	<b>193</b>
	<i>Supriya Tilvi, Mahesh S. Majik and Keisham S. Singh</i>	
8.1	Introduction	193
8.2	Mass Spectrometry (MS)	194
8.3	Tandem Mass Spectrometry (MS <sup>n</sup> )	195
8.3.1	Product or Daughter Ion Scanning	196
8.3.2	Precursor or Parent Ion Scanning	196
8.3.3	Constant Neutral Loss Scanning	196
8.3.4	Selected/Multiple Reaction Monitoring	197
8.4	Liquid Chromatography–Mass Spectrometry (LC-MS)	197
8.5	Application of MS	198
8.6	Peptides	198
8.6.1	Case Study: Cyclodepsipeptides, Kahalalides	199
8.7	Alkaloids	204
8.7.1	Case Study: Bromotyrosine Alkaloids	204
8.8	Lipids	208
8.8.1	Case Study: Molecular Species of Ceramides	209
8.9	Conclusion	213
<b>9.</b>	<b>Chromatography Coupled to Various Detectors as a Tool for Separation and Determination of Bioactive Compounds</b>	<b>219</b>
	<i>Regina M.B.O. Duarte and Armando C. Duarte</i>	
9.1	Introduction	219
9.2	One-Dimensional Chromatography for Bioactive Compound Analysis	221
9.2.1	Setting the Scene and General Trends on the Use of One-Dimensional Liquid Chromatography	221
9.2.2	Application of One-Dimensional Gas Chromatography-Based Methods for Bioactive Compound Analysis	236

9.3	<b>Multidimensional Chromatography for Bioactive Compounds Discovery</b>	<b>238</b>
9.3.1	Concepts and Considerations	238
9.3.2	Exploring the Use of Comprehensive Two-Dimensional Liquid Chromatography	244
9.4	<b>Concluding Remarks</b>	<b>248</b>
<b>10.</b>	<b>Online Combination of Bioassays with Chemical and Structural Characterization for Detection of Bioactive Compounds</b>	<b>253</b>
	<i>Ana C. Freitas, Sofia Isabel G.H.M. Montalvão, Armando C. Duarte and Teresa Rocha-Santos</i>	
10.1	<b>Introduction</b>	<b>253</b>
10.2	<b>High-Throughput Screening Methods</b>	<b>254</b>
10.2.1	High-Throughput Screening Based on Precolumn Methodologies	257
10.2.2	High-Throughput Screening Based on Postcolumn Methodologies	260
10.3	<b>High-Resolution-Based Screening Methods</b>	<b>267</b>
10.3.1	Online Postcolumn Antioxidant Assays	267
10.3.2	Online Postcolumn Affinity/Activity BCD Methods	271
10.3.3	Online MS-Based Assays for Identification and Bioassay Readout	273
10.4	<b>Conclusions and Perspectives</b>	<b>274</b>
	<b>Index</b>	<b>279</b>
