

## CONTENTS

<b>CHAPTER 1 FUNDAMENTAL EQUATIONS FOR FLOW PROCESSES IN THE ULTRACENTRIFUGE</b>	<b>1</b>
<b>CHAPTER 2 SEDIMENTATION TRANSPORT IN TWO-COMPONENT SYSTEMS</b>	
I. Introduction	47
II. The Case of No Diffusion	53
III. Solutions of the Faxén Type	63
IV. Solutions of the Archibald Type	118
V. Pressure Effects	127
<b>CHAPTER 3 SEDIMENTATION TRANSPORT IN MULTICOMPONENT SYSTEMS</b>	
I. Introduction	142
II. Paucidisperse Solutions	148
III. Polydisperse Solutions	166
IV. The Archibald Method	206
<b>CHAPTER 4 SEDIMENTATION TRANSPORT IN CHEMICALLY REACTING SYSTEMS</b>	
I. Introduction	236
II. Basic Equations	238
III. Self-association	242
IV. Isomerization	264
V. Complex Formation	269
<b>CHAPTER 5 SEDIMENTATION EQUILIBRIUM IN NONREACTING SYSTEMS</b>	
I. Introduction	279
II. Two-component Systems	283
III. Three-component Systems	302
IV. Polymer Solutions	320
V. Determinations of Average Molecular Weights and Molecular Weight Distribution	335
VI. Sedimentation Equilibrium in a Density Gradient	354
<b>CHAPTER 6 SEDIMENTATION EQUILIBRIUM IN CHEMICALLY REACTING SYSTEMS</b>	<b>377</b>
I. Discrete Self-association	378
II. Indefinite Self-association	407
III. Complex Formation	416
IV. Other Topics	423

**CHAPTER 7 APPROACH TO SEDIMENTATION EQUILIBRIUM**

**430**

**INDEX**

**451**
