

CONTENTS

1. Principles and General Instrumentation	1
2. Thermal Conductivity Detectors and Their Application to Some Thermodynamic and Kinetic Measurements	25
3. Mass Spectrometric Identification of Gaseous Products from Thermal Analysis	71
4. Pyrolysis-Gas Chromatography Effluent Analysis	101
5. Selective Sorption and Condensation of Effluent Gases	143
6. Analysis of Gas Effluent Streams by Infrared Absorption	155
7. Thermoparticulate Analysis	195
