

CONTENTS

1. History of Spectrochemical Analysis	1
2. Survey of Spectroanalytical Methods	9
3. Physical Principles	23
4. Optical Principles	36
5. Spectrographs and Spectrometers	53
6. Alignment and Illumination of the Spectrograph	81
7. Spectrochemical Sources	103
8. Receivers of Radiation	124
9. Identification of Spectra and Qualitative Analysis	153
10. Measurement of Photographic Density	171
11. Photographic Photometry	183
12. Quantitative Methods	200
