

CONTENTS

1. Introduction	1
2. Historical Background	6
3. Electron Optics and Circuits	22
4. Specimen Observation	49
5. Types of Specimens and Specimen Preparation	64
6. X-Ray Crystal Optics	73
7. Detectors and Energy Dispersion	93
8. Derivation of Equations for Relative X-Ray Intensity	107
9. Quantitative Analysis and Related Topics	125
10. Examples of Applications	142
11. Future Trends and Related Uses	166
