

CONTENTS

INTRODUCTION

1. Qualitative Analysis	1
2. Terms Employed in Qualitative Analysis	1
3. Method of Qualitative Analysis	3
4. Limitations of Tests and Their Significance When Negative	4

PART I. THEORY

1. The Structure of Compounds	5
2. The Coordination Theory	15
3. Acids and Bases	22
4. Salts	26
5. Chemical Equations	29
6. Solutions	36
7. Solutions of Electrolytes	40
8. Physical Equilibrium	49
9. Chemical Equilibrium	53
10. Applications of the Law of Chemical Equilibrium. The Ionization of Weak Acids	59
11. Solubility Product	67
12. Applications of the Solubility Product Principle	72
13. Complex Ions	83
14. Theory of the Solution of Sulphides in Acids	91
15. Theory of Redox Reactions	97
16. Ion Product of Water	106
17. Buffered Solutions	111
18. Hydrolysis of Salts	113
19. The Colloidal State	120

PART II. THE METAL IONS AND THE ANIONS

1. Reactions of the Metal Ions	129
2. Reactions of the Anions	186

PART III. CALCULATIONS

1. Modes of Expressing the Concentration of a Solution	205
2. Calculations Involved in Non-Redox Reactions	214
3. Oxidation-Reduction	216
4. Calculations Involved in Redox Reactions	218
5. Special Problems	220

PART IV. LABORATORY WORK

1. Semimicro Technique and Equipment	221
2. Preparatory Work	239
3. Some General Directions for Laboratory Work	240
4. Preliminary Experiments. The Metal Ions	241
5. Schemes of Analysis for the Metal Ions	252
6. Analysis of a Metal or Alloy	290
7. Preliminary Experiments. The Anions	293
8. Systematic Analysis of a Simple Substance	299

PART V. THE ANIONS AND THE COMPLETE ANALYSIS OF MIXTURES.

1. Systematic Detection of the Anions	307
2. Interferences of Anions in the Analysis for Metal Ions	333
3. Analysis for Cations in Mixtures Containing Interfering Anions	334
4. Interferences in the Analysis for the Cations of Group 3	336
5. Preliminary Experiments on the Phosphate Separation	337
6. The Removal of Phosphate and Modification of Scheme 3 in the Presence of Phosphate (ZrO Cl ₂ Method)	338
7. The Removal of Phosphate (Ferric Chloride Method)	340
8. Complete Analysis	344
