

CONTENTS

Chapter One—Introduction

1.1 History	1-1
1.2 Definition	1-2
1.3 Types of Chromatography	1-2
1.4 Apparatus	1-4
1.5 Results	1-5
1.6 Analytical Liquid Chromatography	1-6
1.7 Advantages and Limitations of High Performance LC	1-7
1.8 Applications	1-8

Chapter Two—The Chromatographic Technique

2.1 Pump	2-1
2.2 Mobile Phase	2-2
2.3 Gradient Elution	2-3
2.4 Sample Introduction	2-5
2.5 Columns	2-6
2.6 Temperature	2-8
2.7 Detectors	2-9
2.8 Data Handling	2-9

Chapter Three--Column Theory

3.1 Resolution	3-1
3.2 Column Efficiency: Zone Spreading	3-3
3.3 Column Selectivity: Zone Separation	3-9
3.4 Column Capacity Factor; Early Elution	3-10
3.5 Peak Shape-Nonlinear Isotherms	3-11
3.6 Achieving Resolution: Efficiency, Selectivity, and Capacity Factor	3-12
3.7 Choosing Column Parameters	3-12

Chapter Four—Selection of the Liquid Chromatographic Separation Mode

4.1 Introduction	4-1
4.2 Liquid Chromatography Separation Modes	4-1
4.3 Selection of the LC Separation Mode	4-23
4.4 Chemical Structures	4-28

Chapter Five--Selection and Optimization of Liquid Chromatography Columns

5.1 Introduction	5-1
5.2 Selection of the Column Packing	5-1
5.3 Selection of the Column Operating Parameters	5-6
5.4 Selection of the Stationary Phase	5-12
5.5 Selection of the Mobile Phase	5-12
5.6 Optimizing the Isocratic Mobile Phase	5-15
5.7 Techniques for Increasing Speed in Liquid Chromatography	5-15
5.8 Solvent Programming (Gradient Elution)	5-17
5.9 Flow Programming	5-21
5.10 Columns for Liquid-Solid Chromatography (LSC)	5-22
5.11 Selection of the LSC Adsorbent	5-25
5.12 Selection of the Mobile Phase in LSC	5-25
5.13 Solvent Programming in LSC	5-29
5.14 Experimental Approach in LSC-Separation of Substituted AZO Dyes	5-30
5.15 Columns for Liquid-Liquid Chromatography (LLC) and Bonded Phase Chromatography (BPC)	5-31
5.16 Selection of the LLC and BPC Liquid Phases	5-32
5.17 Selection of the Mobile Phase in LLC	5-33
5.18 Solvent Programming in LLC and BPC	5-35
5.19 Experimental Techniques in Conventional LLC	5-35
5.20 Experimental Optimization of a BPC Separation	5-37
5.21 Columns for Ion Exchange Chromatography	5-40
5.22 Selection of the Ion Exchange Stationary Phase	5-42
5.23 Selection of the Mobile Phase in Ion Exchange Chromatography	5-44
5.24 Solvent Programming in Ion Exchange Chromatography	5-45
5.25 Optimizing Conditions in Ion Exchange Chromatography-Separation of Adenine and Metabolites	5-45
5.26 Columns for Steric Exclusion Chromatography	5-48
5.27 Selection of the Steric Exclusion Chromatographic Packing Material	5-49
5.28 Selection of the Steric Exclusion Chromatographic Mobile Phase	5-52
5.29 Chemical Structures	5-54

Chapter Six—LC Detectors

6.1 Introduction	6-1
6.2 Performance Criteria	6-2
6.3 UV and Visible Light Absorption Detectors	6-9
6.4 Refractive Index Detectors	6-13
6.5 Heat of Adsorption Detectors	6-17
6.6 Flame Ionization Detectors	6-18
6.7 Other Detectors	6-19
6.8 Comparison of UV, RI, MAD, and FID Detectors	6-19

Chapter Seven—Qualitative Analysis

7.1 Introduction	7-1
7.2 Chromatographic Identification	7-1
7.3 Nonchromatographic Identification	7-8

Chapter Eight—Quantitative Analysis

8.1 The Quantitative Process	8-1
8.2 Generation of Detector Signal	8-1
8.3 Conversion of Detector Signal into Numerical Data	8-3
8.4 Conversion of Numerical Data to Composition	8-12
8.5 Interpretation of the Data	8-15

Chapter Nine—Applications of Liquid Chromatography

9.1 Introduction	9-1
9.2 Nucleic Acid and Constituents	9-1
9.3 Drugs and Pharmaceuticals	9-13
9.4 Pesticides	9-27
9.5 Hydrocarbons	9-30
9.6 Polynuclear Aromatics	9-33
9.7 Complex Mixtures	9-35
9.8 Industrial Chemicals	9-37
9.9 Separations Based Upon Molecular Size	9-41
9.10 Amino Acids	9-46
9.11 Carbohydrates	9-46

Chapter Ten-Apparatus

10.1 Introduction	10-1
10.2 Pumping System	10-2
10.3 Gradient Apparatus	10-9
10.4 Temperature Control	10-12
10.5 Pressure Measurement	10-18
10.6 Injectors	10-18
10.7 Degassing	10-20

Chapter Eleven—Troubleshooting and Maintenance

11.1 Troubleshooting	11-1
11.2 Routine Maintenance	11-6

Chapter Twelve—Laboratory Exercises

12.1 Laboratory Exercise # 1-Qualitative and Quantitative Analysis	12-1
12.2 Laboratory Exercise #2-Separation of Polystyrenes by Exclusion Chromatography	12-2
12.3 Laboratory Exercise #3-Qualitative Analysis of Analgesic Tablets	12-3
12.4 Laboratory Exercise #4-Determination of Column Efficiency	12-4
