

CONTENTS

PART 1-GENERAL	11
1.1 Principles of Chromatography	11
1.2 Technique of Paper Chromatography	12
1.3 Technique of Thin-Layer Chromatography	38
1.4 Uses of Paper and Thin-Layer Chromatography	62
1.5 Relationships between Chromatographic Behaviour and Chemical Structure	77
1.6 List of Firms Supplying Equipment and Materials	82
1.7 Literature on Paper and Thin-Layer Chromatography	84
PART 2-APPLICATIONS	89
2.1 Hydrocarbons	89
2.2 Halogen Derivatives	96
2.3 Alcohols	98
2.4 Phenols	115
2.5 Ethers	132
2.6 Oxo Compounds	135
2.7 Organic Peroxides	151
2.8 Carbohydrates	152
2.9 Carboxylic Acids	161
2.10 Lipids	185
2.11 Steroids	192
2.12 Terpenes	203
2.13 <i>O</i> -Heterocyclic Compounds	206
2.14 Amines	212
2.15 Nitro Compounds	229
2.16 Hydroxylamines, Hydrazines, Hydrazo Compounds, Triazenes, and Diazonium Salts	238
2.17 <i>N</i> -Heterocyclic Compounds	240
2.18 Sulphur Compounds	259
2.19 Organic Phosphorous Compounds	275
2.20 Organometallic Compounds	284
2.21 Vitamins	292
2.22 Antibiotics	300
2.23 Alkaloids	304
2.24 Synthetic Dyes	306
2.25 Inorganic Compounds	315
2.26 Radioactive Compounds	320
Appendix-Detection Reagents	323
Subject Index	336
List of Compounds Chromatographed	343
