

CONTENTS

Preface	iii
Chapter 1. FUNDAMENTALS OF GAS-LIQUID CHROMATOGRAPHY	1
I. Chromatographic Processes	1
II. General Theory and Principles of Gas-Liquid Chromatography	4
III. Theories of Linear Chromatography	7
IV. Column Efficiency	11
V. Separating Power	31
VI. Resolution	33
VII. Factors Affecting the Speed of Gas Chromatographic Separations	34
References	53
Chapter 2. DETECTORS-OPERATING PRINCIPLES AND THEORY	55
I. Thermal Conductivity Detector	56
II. Hydrogen Flame Ionization Detector	68
III. Argon Ionization Detector	81
IV. Electron Affinity Detector	84
V. Coulometric Detector	91
VI. Sensitivity, Performance Specifications, and Operating Characteristics of Detectors	96
References	105
Chapter 3. QUALITATIVE METHODS FOR MOLECULAR STRUCTURE DETERMINATION BY GAS CHROMATOGRAPHY	109
I. Retention Time Data	109
II. Use of Polar-Nonpolar Liquid Stationary Phases	126
III. Log-Log Retention Time Correlations	142
IV. Retention Time-Physical Property Correlations (Homologous Series)	153
V. Subtractive Chromatographic Techniques	182
VI. Functional Group Analysis of Gas Chromatographic Effluents	192
VII. Formation of Derivatives by Chemical Means	202
VIII. Identification of Compounds by Specific Thermal and Pyrolytic Degradation Patterns	226
IX. Use of Specific Detection Systems	252
References	282

Chapter 4. QUANTITATIVE METHODS OF ANALYSIS BY GAS	
CHROMATOGRAPHY	295
I. Quantitative Methods of Analysis	295
II. An Integrated, Computerized Gas Chromatographic System	311
References	335
Author Index	337
Subject Index	349
