

## CONTENTS

**Chapter 1 BACKGROUND LITERATURE OF GAS CHROMATOGRAPHY**

|                                     |    |
|-------------------------------------|----|
| 1.1 Introduction                    | 1  |
| 1.2 Literature Sources              | 2  |
| 1.3 Selection of Literature Sources | 16 |

**Chapter 2 RETENTION DATA**

|   |    |
|---|----|
| 2.1 Introduction                          | 18 |
| 2.2 Calculation of Relative Retention     | 19 |
| 2.3 Determination of Column Dead Volume   | 21 |
| 2.4 Specific Retention Volume             | 23 |
| 2.5 The Kovats Retention Index            | 24 |
| 2.6 Temperature-Programmed Retention Data | 28 |
| 2.7 Measurement of Peak Maximum           | 29 |
| 2.8 Standardization of Retention Data     | 30 |
| References                                | 33 |

**Chapter 3 QUALITATIVE ANALYSIS**

|   |    |
|---|----|
| 3.1 Introduction  | 35 |
| 3.2 Stationary Phase Selection                                | 37 |
| 3.3 Retention Structure Relationships                         | 41 |
| 3.4 Gas Chromatography and Chemical Reaction                  | 46 |
| 3.5 Instrumental Examination of Gas Chromatographic Fractions | 56 |
| References  | 63 |

**Chapter 4 QUANTITATIVE ANALYSIS**

|                              |    |
|------------------------------|----|
| 4.1 Introduction             | 69 |
| 4.2 Measurement of Peak Area | 70 |
| 4.3 Sample Injection         | 73 |
| 4.4 Internal Standardization | 74 |
| References                   | 77 |

**Chapter 5 ANALYSIS OF SOLVENTS AND THEIR MIXTURES**

|  |     |
|--|-----|
| 5.1 Introduction                         | 79  |
| 5.2 Separation of Solvents from Coatings | 81  |
| 5.3 Mixed Solvents                       | 90  |
| 5.4 Hydrocarbon Fractions                | 97  |
| 5.5 Selective Stationary Phases          | 98  |
| 5.6 Separation of Xylenes                | 102 |
| References                               | 104 |

## **Chapter 6 ANALYSIS OF PLASTICIZERS**

|                               |     |
|-------------------------------|-----|
| 6.1 Introduction              | 108 |
| 6.2 Separation of Plasticizer | 109 |
| 6.3 Plasticizer Analysis      | 110 |
| 6.4 References                | 117 |

## **Chapter 7 DETERMINATION OF RESIDUAL MONOMER**

|   |     |
|---|-----|
| 7.1 Introduction                          | 119 |
| 7.2 Injection of Polymer Solution         | 120 |
| 7.3 Polymer Precipitation                 | 122 |
| 7.4 Extraction of Residual Monomer        | 122 |
| 7.5 Removal of Water by Chemical Reaction | 124 |
| References                                | 125 |

## **Chapter 8 MONOMER EXAMINATION AND PURITY**

|   |     |
|---|-----|
| 8.1 Introduction                        | 127 |
| 8.2 Acrylate Esters                     | 128 |
| 8.3 Acrylonitrile                       | 130 |
| 8.4 Divinylbenzene                      | 131 |
| 8.5 Styrene and $\alpha$ -Methylstyrene | 132 |
| 8.6 Methacrylate Esters                 | 136 |
| 8.7 Vinyl Chloride                      | 139 |
| 8.8 Vinyl Esters                        | 139 |
| 8.9 Vinyl Ethers                        | 141 |
| References                              | 143 |

## **Chapter 9 ANALYSIS OF AEROSOL PROPELLANTS IN COATING PRODUCTS**

|                             |     |
|-----------------------------|-----|
| 9.1 Introduction            | 146 |
| 9.2 Analysis of Propellants | 147 |
| References                  | 151 |

## **Chapter 10 ANALYSIS OF POLYESTER AND ALKYD RESINS**

|                                       |     |
|---------------------------------------|-----|
| 10.1 Introduction                     | 152 |
| 10.2 Qualitative Analysis             | 154 |
| 10.3 Quantitative Analysis            | 163 |
| 10.4 Analysis of Linear Polyesters    | 165 |
| 10.5 Determination of Reactant Purity | 167 |
| References                            | 171 |

## **Chapter 11 ANALYSIS OF RESINS AND THEIR COMPONENTS**

|                                 |     |
|---------------------------------|-----|
| 11.1 Introduction               | 174 |
| 11.2 Acrylic Polymers           | 175 |
| 11.3 Polyvinyl Acetate          | 177 |
| 11.4 Epoxy Systems              | 178 |
| 11.5 Polyurethanes              | 186 |
| 11.6 Polyethers                 | 188 |
| 11.7 Polyamides                 | 192 |
| 11.8 Phenol-Formaldehyde Resins | 195 |
| 11.9 Polysiloxanes              | 199 |
| 11.10 Cellulose Derivatives     | 201 |
| 11.11 Starch Derivatives        | 205 |
| References                      | 205 |

## **Chapter 12 VEGETABLE OILS AND FATTY ACIDS**

|                                  |     |
|----------------------------------|-----|
| 12.1 Introduction                | 210 |
| 12.2 Chromatographic Separations | 213 |
| 12.3 Triglyceride Separations    | 214 |
| 12.4 Free Fatty Acids            | 215 |
| 12.5 Ester Formation             | 218 |
| 12.6 Processed Oils              | 224 |
| References                       | 229 |

## **Chapter 13 ANALYSIS OF POLYMER AND COATING ADDITIVES**

|   |     |
|---|-----|
| 13.1 Introduction                           | 234 |
| 13.2 Antioxidants and Ultraviolet Absorbers | 235 |
| 13.3 Driers                                 | 244 |
| 13.4 Promoters                              | 245 |
| 13.5 Preservatives                          | 246 |
| References                                  | 246 |

## **Chapter 14 POLYMER AND COATING PYROLYSIS**

|   |     |
|---|-----|
| 14.1 Introduction   | 249 |
| 14.2 Pyrolysis Procedures                                   | 250 |
| 14.3 Polymer Degradation                                    | 258 |
| 14.4 Pyrolysis of Copolymer Systems                         | 269 |
| 14.5 Condensation Polymers                                  | 275 |
| 14.6 Fingerprint Chromatograms and Tabulations of Pyrolysis | 282 |
| References  | 289 |

**Chapter 15 THE EXAMINATION OF FILMS**

|                         |     |
|-------------------------|-----|
| 15.1 Introduction       | 298 |
| 15.2 Residual Solvent   | 299 |
| 15.3 Film Permeability  | 303 |
| 15.4 Film Deterioration | 304 |
| References              | 305 |
| <br>                    |     |
| Author Index            | 307 |
| Subject Index           | 325 |
