CONTENTS

CHAPTER 1 INTRODUCTION 4

CHAPTER 2 PRINCIPLES OF RETENTION AND COLUMN SELECTIVITY

2.1 Basic principles 5

2.2 Theory of column selectivity 11

2.3 Column selectivity in practice 20

CHAPTER 3 IDENTIFICATION BASED ON RETENTION

3.1 Retention coincidence 38

3.2 Retention correlation 46

3.3 The presentation of retention data 57

3.4 Identification by means of the Kovats index 60

CHAPTER 4 SELECTIVE ABSTRACTION AS A MEANS OF IDENTIFICATION

4.1 Complete abstraction 66

4.2 Pre-column partition 79

CHAPTER 5 TECHNIQUES OF IDENTIFICATION INVOLVING CHEMICAL MODIFICATION OF THE SAMPLE

5.1 Functional group analysis 86

5.2 Ozonolysis 92

5.3 Gas chromatography of derivatives: Peak shift techniques 95

5.4 Hydrogenation and dehydrogenation 101

5.5 Carbon skeleton chromatography 103

5.6 Reaction rate methods 105

CHAPTER 6 PYROLYSIS GAS CHROMATOGRAPHY AND OTHER DEGRADATIVE METHODS OF IDENTIFICATION

6.1 General considerations 111

6.2 Pyrolysis units 112

6.3 Pyrolysis gas chromatography as a means of identification 117

6.4 Photolysis gas chromatography 130

CHAPTER 7 MEASUREMENT OF MOLECULAR WEIGHT IN GAS CHROMATOGRAPHY

7.1 Microgravimetric methods 137

7.2 Measurement of number of moles 139

7.3 Gas-density detector 142

CHAPTER 8 IDENTIFICATION FROM DETECTOR RESPONSE

8.1 Detector response 152

8.2 Dual-detector systems 180

CHAPTER 9 PEAK TRAPPING

9.1 Physical background to trapping 191

9.2 Types of trap 198

CHAPTER 10 INFRARED AND OTHER SPECTROSCOPIC TECHNIQUES OF IDENTIFICATION

10.1 Infrared spectroscopy 211

10.2 Ultraviolet spectroscopy 225

10.3 Nuclear magnetic resonance 226

CHAPTER 11 COMBINED GAS CHROMATOGRAPHY AND MASS SPECTROMETRY (GC-MS)

11.1 Limitations and advantages of GC-MS 229

11.2 Important features of the mass spectrometer 235

11.3 Sample transfer from GC to MS 244

11.4 Computerised GC-MS 256
