

CONTENTS

1. Introduction	15
1.1 Concentration distribution of the eluted substance at the column outlet	17
1.2 detector signal	22
1.3 Effect of the measuring device on signal changes	24
1.4 Sample injection	28
1.5 Parameters characterizing detectors	30
1.6 Literature	37
2. The Thermal Conductivity Detector (TCD)	39
2.1 Detection mechanism	39
2.2 TCD signal	42
2.3 Effect of experimental parameters on the magnitude and shape of the TCD signal	46
2.4 Applications of the TCD	56
2.5 Literature	57
3. Ionization Detectors	59
3.1 Physical principles of the detection	59
3.2 Ionization energy sources	65
3.3 Reactions in the ionization detector	68
3.4 Literature	71
4. The Electron Capture Detector (ECD)	72
4.1 Detection mechanism	72
4.2 ECD signal	74
4.3 Experimental conditions affecting the ECD signal	79
4.4 Applications of the ECD	82
4.5 Literature	85
5. The Flame Ionization Detector (FID)	87
5.1 Detection mechanism	87
5.2 FID signal	91
5.3 Experimental conditions affecting the magnitude and character of the FID signal	95
5.4 FID applications	101
5.5 Literature	102

6. The Thermionic Detector Using an Alkali Metal Salt (TIDA)	105
6.1 Detection mechanism	106
6.2 TIDA signal	109
6.3 Effect of the experimental conditions on the magnitude and character of the TIDA signal	117
6.4 TIDA applications	120
6.5 Literature	121
7. The Photoionization Detector (PID)	123
7.1 Detection mechanisms	123
7.2 PID signal	125
7.3 Effect of the experimental conditions on the PID signal	128
7.4 PID applications	131
7.5 Literature	133
8. The Helium Detector (HeD)	133
8.1 Detection mechanism	133
8.2 HeD signal	135
8.3 Effect of experimental conditions on the HeD signal	140
8.4 HeD applications	143
8.5 Literature	144
9. The Flame Photometric Detector (FPD)	145
9.1 Detection mechanism	145
9.2 FPD signal	149
9.3 Effect of experimental conditions on the magnitude of the FPD signal	155
9.4 Use of the flame photometric detector	159
9.5 Literature	162
10. The Coulometric Detector (CD)	165
10.1 Detection mechanism	165
10.2 CD signal	169
10.3 Effect of experimental conditions on the magnitude of the CD signal	172
10.4 Applications of the CD	175
10.5 Literature	179
11. The Electrolytic Conductance Detector (EICD)	181
11.1 Detection mechanism	181
11.2 EICD signal	183
11.3 Construction of the ELCD	186
11.4 Applications of the ELCD	187
11.5 Literature	188
Index	189
