

CONTENTS

Part I. General Considerations

- | | |
|--|----|
| 1. Nature and Types of Ion Exchange Materials | 3 |
| 2. Properties and Behavior: Swelling and Equilibria | 36 |
| 3. Properties and Behavior: Kinetics, Electrolyte Penetration, and Absorption of Nonelectrolytes | 66 |
| 4. Chromatographic Phenomena in Columns | 86 |

Part II. Materials, Techniques, and Apparatus

- | | |
|---|-----|
| 5. Commercial Materials | 107 |
| 6. Simple Procedures | 130 |
| 7. Techniques of Ion Exchange Chromatography | 157 |
| 8. Ion Exclusion and Partition Chromatography | 178 |
| 9. Membranes | 188 |

Part III. Specific Applications

- | | |
|---|-----|
| 10. Bone as an Ion Exchange System | 197 |
| 11. Ion Exchange Properties of Cells and Tissues | 213 |
| 12. Bacteriology | 235 |
| 13. Virology | 248 |
| 14. Separation of Amino Acids | 255 |
| 15. Separation of Peptides | 299 |
| 16. Chromatography of Proteins and Nucleic Acids | 318 |
| 17. Nucleic Acid Derivatives | 345 |
| 18. Chromatographic Investigations of Non-Steroid Hormones | 360 |
| 19. Ion Exchange Techniques in Enzyme Studies | 377 |
| 20. Separation of Carbohydrates | 392 |
| 21. Isolation and Analysis of the Components of Urine | 418 |
| 22. Applications to Blood | 432 |
| 23. Sodium and Potassium Removal in vivo | 451 |
| 24. Gastric Acidity | 468 |
| 25. Miscellaneous Medical and Pharmaceutical Applications | 478 |
| 26. Exchange Adsorption in Man | 486 |
| 27. Isolation and Purification of Antibiotics | 502 |
| 28. Vitamins | 520 |
| 29. Alkaloids | 533 |
| 30. Ion Exchangers of Plant Origin and Use of Resins in Plant Chemistry | 548 |

31. Plant Physiology	573
32. Commercial Purification of Sugars and Polyhydric Alcohols	602
33. Treatment of Alcoholic Beverages and Fruit Juices	614
34. Milk and Milk Products	626
35. Ion Exchangers in Organic Chemistry	640
36. Ion Exchangers as Catalysts	658
37. Water Treatment	688
Author Index	701
Subject Index	735
