

CONTENTS

1. Factors Involved in Producing Uniform Spots	1
2. Quantitation of Paper Chromatograms	17
3. Quantitative Thin-Layer Chromatography using Elution Techniques	29
4. Quantitative Thin-Layer Chromatography using Densitometry	51
5. Quantitative Thin-Layer Chromatography using Fluorimetry	71
6. Advantages and Problems of Direct Spectrophotometry on Thin-Layer Chromatograms	79
7. The Application of Spectroscopy to Thin-Layer Chromatography	91
8. The Visual Assessment of Thin-Layer Chromatograms	101
9. Quantitative Scanning of Radioactive Thin-Layer Chromatograms	107
10. Bidimensional Radiochromatogram Scanning	119
11. The Evaluation of Radiochromatograms using a Spark Chamber	123
