

CONTENTS

A. The Historical Development of the Method	1
B. Adsorbents for TLC	6
I. Silica Gel	7
II. Aluminas and Other Inorganic Adsorbents	23
III. Organic Adsorbents	32
IV. Polyamides as Adsorbents	41
V. Ion Exchangers in TLC. K. DORFNER	44
VI. Modification of Adsorbents by Impregnation	48
C. Apparatus and General Techniques in TLC	52
I. Preparation of Thin, Uniform Layers	52
II. Preparation of TLC-Plates	60
III. Separation Chambers and Development	65
IV. Aids for Visualisation of Colourless Substances on Chromatograms	77
V. Laboratory and Basic Equipment for TLC	83
VI. Standard Conditions in TLC	85
D. Special Techniques in TLC	86
I. Special Development Procedures	86
II. Gradient-Techniques in TLC	89
III. Temperature-TLC	94
IV. Preparative-TLC	97
V. Transfer Techniques	102
E. Thin-Layer Electrophoresis	105
I. Principle of Thin-Layer Electrophoresis	105
II. Theoretical Principles	106
III. Details of Apparatus and Methods	109
F. Coupling of Gas-and Thin-Layer Chromatography	114
I. Principle of the GC-TLC-Coupling Analysis	115
II. Equipment	118
III. Information from Coupling Analysis	120
IV. Details of Apparatus and Methods	121
V. Examples of Application	124

G. Documentation of Thin-Layer Chromatograms	125
I. <i>R_f</i> -values in TLC	127
II. Preservation of Thin-Layer Chromatograms	127
III. Graphical Copying	128
IV. Documentation with Light-Sensitive Paper	129
H. Quantitative Evaluation of Thin-Layer Chromatograms	133
I. Quantitative Evaluation on the TLC-Layers	135
II. Quantitative Determination after Extraction from the Adsorbent Layer	145
I. Isotope Technique	155
I. Layers, Solvents and Chemical Methods of Detection	156
II. Procedures for Detection and for Measurement of Radioactivity	157
III. Preparation of Radioactively Labelled Substances	167
IV. Isolation of Radioactive Compounds by TLC	168
V. Analysis by Means of Radioisotopes	170
VI. Directions for Radioactive Labelling	175
VII. Applications of TLC in Chemical and Biochemical Investigations with Radioisotopes	176
Special Section	
J. Terpene Derivatives, Essential Oils, Balsams and Resins	206
I. Separation of Lipophilic, Steam-volatile Mixtures	207
II. Chromatographic Separation of Lipophilic, Steam-volatile Mixtures	208
III. Essential Oils	235
IV. TLC of Involatile Terpene Derivatives	240
V. Balsams and Resins	247
K. Vitamins, Including Carotenoids, Chlorophylls and Biologically Active Quinones	259
I. Method of Work and General Experience	259
II. TLC of Fat-Soluble Vitamins, Carotenoids, Chlorophylls and Quinones	263
III. TLC of Water-Soluble Vitamins	292
L. TLC of Steroids and Related Compounds	311
I. Nomenclature	312
II. Range of Application of TLC of Steroids in Comparison with other Chromatographic Methods	313
III. General Conditions	316
IV. Structure and Chromatographic Behaviour	326
V. Sterols	329
VI. Neutral C ₁₈ -C ₂₂ -Steroids	334

VII. Cardiac Glycosides and Aglycones	341
VIII. Saponins and Sapogenins	346
IX. Aminosteroids, Steroid Alkaloids and Glycosides	348
X. Phenolic Steroids (Oestrogens)	349
XI. Bile Acids and Conjugates, Steroid Carboxylic Acids and Steroid Conjugates	351
M. Aliphatic Lipids	363
I. Introduction	363
II. Thin-Layer Chromatography of Lipids	374
N. Alkaloids	421
I. Adsorbent Layers and Solvents for TLC	421
II. Visualisation of the Alkaloids	423
III. Separation Scheme for Alkaloids	424
IV. Quantitative Determination of Alkaloids with TLC	425
V. Special Section	425
O. "Simple" Indole Derivatives and Plant Growth Regulators. Urine Metabolites, Auxins, Gibberellins and Cytokinins	471
I. Introduction	471
II. Preparation of the Material for Analysis	473
III. Adsorbent and Solvents	475
IV. Multiple Development, Stepwise Development and Two-Dimensional separation	481
V. Visualisation and Identification	483
P. Amines and Tar Bases	494
I. Amines	494
II. Tar Bases	503
Q. Synthetic Pharmaceutical Products	506
I. Analysis of Various Drug Forms and of Commercial Preparations	554
II. Stability Tests on Pharmaceutical Materials	558
R. Antibiotics	566
I. Polyenes and Polyacetylenes	571
II. Macrolides	572
III. Tetracyclines	573
IV. Substances with Similar Structural Units	574
V. Basic, Water-Soluble, Non-extractable Antibiotics	574
VI. Nucleic Acid Derivatives	575

VII. Acyclic Compounds	575
VIII. Heterocyclic Compounds	575
IX. Macrocyclic Peptides	576
X. Other Peptides	576
XI. Miscellaneous Antibiotics	576
S. TLC in Clinical Diagnosis	578
I. Investigation of Endogenous Substances	579
II. Investigations of Exogenous Substances	604
TF. Synthetic Colouring Materials	612
I. Solvent Dyes	612
II. Disperse Dyes	616
III. Organic Pigments	617
IV. Basic Dyes	618
V. Acid Dyes	620
VI. Direct Dyes	621
VII. Reactive Dyes	622
VIII. Metal Complex Dyes	623
IX. Synthetic Food Colorants	624
X. Dye Intermediates	626
TN. Foodstuffs and Their Additives	630
I. General Applications	630
II. Antioxidants	631
III. Preservatives	636
IV. Pesticides	638
V. Artificial Sweeteners	648
VI. Emulsifiers and Swelling Agents	649
VII. Alcohols and Glycols	650
VIII. Organic Acids	650
TS. Synthetic Organic Products	657
I. Plastics and Plasticisers	657
II. Organo-Metallic Compounds	664
III. Polyphenyls and Fused Polynuclear Aromatic Hydrocarbons	666
IV. Explosives	669
V. Industrial Additives	673
VI. Intermediates in Organic Synthesis	677

U. Hydrophilic Plant Constituents and Their Derivatives	686
I. Plant Phenol Derivatives	687
II. TLC in the Characterisation of Animal and Plant Drugs	706
III. TLC as a Legally Binding method for Characterisation of Drugs	720
V. Amino Acids and Derivatives	730
I. Introduction	730
II. General Technique	732
III. Amino Acids	734
IV. Peptides	751
V. N-(2,4-Dinitrophenyl)-amino Acids and 3-Phenyl-2-Thiolydantoin	756
A. Dinitrophenylamino Acids	756
B. Phenylthiohydantoin	772
C. Other Amino Acids Derivatives	777
D. Iodoamino Acids and Similar Compounds	779
W. Nucleic Acids and Nucleotides	786
I. Introduction	786
II. Thin-Layer Chromatography of Nucleic Acids and their Constituents	792
III. Thin-Layer Electrophoresis of Hydrolysis Products of Nucleic Acids	802
X. Sugars and Derivatives	807
I. Introduction	807
II. Preparation of Plates	807
III. Visualization	810
IV. Chromatography of Sugars and Derivatives	811
V. Monitoring Reactions by TLC	831
Y. Inorganic Ions	837
I. Preparation of the Solutions for Analysis	838
II. TLC of the Cations Separated in this Preliminary Stage	839
III. Separation of Special Cation Mixtures	843
IV. Separation of Anions	847
V. Quantitative Determination	851
Z. Spray Reagents	854
I. Preparation and Application of the Spray Reagents	855
II. Compounds or Compound Classes and Reagents for their Detection	905
III. Names and Abbreviations of Reagents	909

Conversion table for R_f into R_m and vice versa	910
Terms Frequently used in Thin-Layer chromatography	912
List of Manufacturers and Suppliers	918
Author Index	924
Subject Index	1023
