

**CONTENTS****General Section**

A. History of the Development of Thin-Layer Chromatography	1
B. Instruments used in Thin-Layer Chromatography and their Operation	5
C. Coating Materials for Thin-Layer Chromatography	29
D. Special Techniques	34
E. Documentation of Thin-Layer Chromatograms	40
F. Quantitative Evaluation of Thin-Layer Chromatograms	44
G. Isotope Techniques	58
H. Theoretical Aspects of Thin-Layer Chromatography	75

**Special Section**

Introduction	134
A. Aliphatic Lipids	137
B. Terpene Derivatives, Essential Oils, Balsams, and Resins	186
C. Vitamins	210
D. Steroids (Sterols; Pregnane-, Androstane-, and Estrane-Compounds; Bile Acids and Cardiac Glycosides)	249
E. Organic Bases	279
F. Pharmaceutical Products	306
G. Thin-Layer Chromatography in Clinical Diagnosis and Pharmacology	335
H. Synthetic Organic Materials	344
I. Hydrophilic Constituents of Plants	371
J. Amino Acids and Derivatives	391
K. Nucleic Acids and Nucleotides	440
L. Sugars and Derivatives	461
M. Thin-Layer Chromatography of Inorganic Ions	469
N. Spray Reagents for Thin-Layer Chromatography	483
O. Terminology of Thin-Layer Chromatography (English-German-French)	503
P. Commercial Suppliers	506
