| | |
|--|----|
| 1. Introduction | 3 |
| 2. Affinity chromatography | 5 |
| 2.1. The principle of affinity chromatography | 6 |
| 2.2. The matrix | 7 |
| 2.3. The ligand | 7 |
| 2.4. Spacer arms | 8 |
| 2.5. Coupling gels | 9 |
| 2.6. Group specific adsorbents | 9 |
| 3. Coupling gels for ligand immobilization | 11 |
| 3.1. Choice of coupling gel | 12 |
| 3.2. CNBr-activated Sepharose 4B | 12 |
| 3.3. AH-Sepharose 4B, CH-Sepharose 4B | 18 |
| 3.4. Activated CH-Sepharose 4B | 24 |
| 3.5. Epoxy-activated Sepharose 6B | 27 |
| 3.6. Thiopropyl-Sepharose 6B | 33 |
| 3.7. Affinity chromatography with Sepharose CL | 33 |
| 4. Covalent chromatography | 35 |
| 4.1. Activated Thiol-Sepharose 4B | 36 |
| 4.2. Thiopropyl-Sepharose 6B | 37 |
| 5. Group specific adsorbents | 47 |
| 5.1. Protein A-Sepharose CL-4B | 48 |
| 5.2. Immobilized lectins | 52 |
| 5.3. Con A-Sepharose | 52 |
| 5.4. Lentil Lectin-Sepharose 4B | 57 |
| 5.5. Wheat germ Lectin-Sepharose 6MB | 60 |
| 5.6. Poly(U)-Sepharose 4B | 62 |
| 5.7. Poly(A)-Sepharose 4B | 65 |
| 5.8. Lysine-Sepharose 4B | 69 |
| 5.9. Blue Sepharose CL-6B | 74 |
| 5.10. 5'AMP-Sepharose 4B, 2'5'ADP-Sepharose 4B | 79 |
| 6. General experimental methods | 83 |
| 7. Some applications | 91 |
| 7.1. Immunoadsorbents | 92 |
| 7.2. Nucleic acids | 95 |
| 7.3. Plasma proteins | 96 |
| 7.4. Affinity chromatography of cells | 96 |
| 7.5. General | 97 |
| References | 99 |
