

# Contents

*TLC-Nomenclature* . . . . . xii

*Chapter 1* . . . . . 1

**L. S. BARK**

*The  $R_M$  Function and Its Use in the Structural Analysis of Organic Compounds*

- General Problems 1
- Determination of  $AR_{M(,,-)}$  Values 12
  - Steroids 17
  - Acids and Esters 25
  - Phenols 28
  - Amines 37
  - Steric Factors 39
- The Use of  $AR_M$ -Values for Structural Elucidation 41
- Changes Brought about by Modification of Structure ( $AR_{M(,,-)}$  values) 43
- Conclusion 47
- References 48

*Chapter 2* . . . . . 53

**F. SNYDER**

*Thin-Layer Radiochromatography and Related Procedures*

- Description of Techniques 53
  - Elution Analysis 53
  - Strip Scanning 55
  - Autoradiography 57
  - Zone Analysis: Area Scraping and Zonal Profile Scans by Liquid Scintillation Radioassay 58
  - Beta Camera 60
  - Combustion Analysis 61
- Radiation **Safety** Applied to Radiochromatographic Procedures 61
- Radiation Decomposition 62
- Radiopurity Determination 62
- Biochemical and Chemical Alterations Measured by TLC Radiochromatography 63
- The Use of Labeled Internal Standards in Studies of Chromatographic Resolution 63
- Mass Measurements by Radiometric Procedures 63
  - Liquid Scintillation Quenching 63
  - The Use of Labeled Derivatives 66

On-Line Computer Monitoring of Radiochromatographic Measurements	66
Specific Applications of Radiochromatography to Compounds of Biological Interest	67
Gas-Liquid Radiochromatography Combustion Techniques	67
Noncombustion Techniques	68
References	69

**Chapter 3 . . . . . 75**

**L. J. MQRRIIS and B. W. NICHOLS**

***Argentation Thin-Layer Chromatography of Lipids***

Introduction	75
Fatty Acids	77
Diglycerides and Triglycerides	82
Phospholipids and Glycolipids	84
References	88

**Chapter 4 . . . . . 95**

**N. SEILER and M. WIECHMANN**

***TLC Analysis of Amines as Their DANS-Derivatives***

Reaction of Dansyl Chloride with Amines, Phenols, and Other Compounds	98
Reactivity of Different Functional Groups	98
Reaction Conditions	103
Labeling of Amines and Phenols in the Nanomole Scale	104
Synthesis of DANS-Derivatives in Preparative Scale	107
Preparation of 1-Dimethylamino-naphthalene- 5-sulphonyl Chloride	108
Some Side Reactions	109
TLC Separation of <b>DANS-Amides</b>	111
General Considerations	111
Generally Applicable Separating Systems	112
Catechol Derivatives	117
Aliphatic Diamines	118
Choline	119
Amino Sugars	120
Rf-Values of DANS-Derivatives	127
Quantitative Determination of DANS-Derivatives	127
Fluorescence Characteristics of DANS-Derivatives	127
Elution Method	128
Direct Fluorometric Evaluation	131
Microdetection of Amines in Tissues	135
Estimation of Enzyme Activities	137
Conclusion	138
References	139

**Chapter 5 . . . . . 147**

**E. ZAPPI**

***Identification of Circulating Phenolic Iodoamino Acids by  
Thin-Layer Chromatography***

Chromatography on Silica Gel	150
Chromatography on Cellulose	154

Other Techniques	157
Detection	157
Quantitative Determination	161
Extraction Procedures	163
References	164

**Chapter 6 . . . . . 169**

**E. MOCZAR and M. MOCZAR**

***Thin-Layer Chromatography in Studies of Carbohydrate Side Chains of Glycoproteins***

Analysis of the Monosaccharide Components	170
Neutral Sugars	170
Hydrolysis of Glycoproteins	170
Hydrolysis of Glycopeptides	171
Application of the Samples for TLC	171
Chromatography on Inorganic Layers	171
Chromatography on Cellulose Layers	174
Chromatography on Thin-Layers of Organic Polymers	175
Hexosamines	175
Hydrolysis of Glycoproteins and of Glycopeptides	175
Separation by TLC	175
Quantitative Determination of Neutral and Amino Sugars	176
Densitometric Determination	
of Neutral Sugars and Osamines	177
Spectrophotometric and Volumetric	
Determination after Elution	181
Elution of the Spots	181
Elution of the Nondetected Sugars	181
Separation of Sugars and Their Derivatives Formed	
by Partial Hydrolysis of Heteropolysaccharides	181
Partial Hydrolysis with Mineral Acids	182
Detection of the Aspartamido-Glucosaminic Linkage	182
Partial Hydrolysis by Ion-Exchange Resin	
and Chromatography	182
Hydrolysis	183
Chromatography of Partial Hydrolysates	183
Detection of Oligosaccharides	183
Scope and Limitation of the Method	184
Acetolysis of the Polysaccharides	
and TLC of the Products	184
Acetolysis	185
TLC of Acylated Sugar Derivatives	186
Separation of the Deacylated Oligosaccharides	188
TLC of Methylated Sugars	189
Methylation	189
Hydrolysis of Methylated Polysaccharides	189
Chromatography of Partially Methylated Sugars	189
Detection of Partially Methylated Sugars	191
Scope and Limitation of the Method	191
Conclusion	191
References	191
