

CONTENTS

PART I

I.	Electrolytes and Non-Electrolytes	1
II.	The Structure of Atoms and Molecules	34
III.	Oxidation and Reduction	58
IV.	Reaction Velocity and Chemical Equilibrium	71
V.	Equilibria Involving Weak Acids and Bases	95
VI.	Heterogeneous Equilibrium – The Solubility Product – Colloids	128
VII.	Polybasic Acids – Precipitation with Hydrogen Sulfide	152
VIII.	The Ionization of Water – Hydrolysis	173
IX.	Complex Ions	216
X.	Amphoteric Substances	245
XI.	Oxidation–Reduction Equilibria	262

PART II

XII.	Laboratory Techniques	289
XIII.	The Alkali Metal Group of Ions	312
XIV.	The Silver Group	318
XV.	The Copper- Arsenic Group	337
XVI.	The Aluminum-Zinc Group of Ions	369
XVII.	The Alkaline Earth Group of Ions	401
XVIII.	Analysis of the Positive Ions	416
XIX.	The Preparation of a Sample for Analysis – Analysis of Solids	425
XX.	Identification of the Negative Ions	437
XXI.	The Chemical Properties of Negative Ions	455
