

# CONTENTS OF VOLUME

<i>Introduction to the Series</i>	v
<i>Contributors to Volume 1</i>	vi
<i>Contents of Volume 2</i>	

## **AC Polarography and Related Techniques: Theory and Practice**

DONALD E. SMITH

.. Introduction	2
II. The AC Polarographic Experiment	3
III. Theory	13
IV. Instrumentation	102
V. Data Analysis	132
References	148

## **Applications of Chronopotentiometry to Problems in Analytical Chemistry** 15'

DONALD G. DAVIS

Introduction	
II. Theory	
III. Experimental Methods	
IV. Applications	8.
References	

## **Photoelectrochemistry and Electroluminescence** 197

THEODORE KUWANA

I. Introduction and Scope	
II. Nomenclature	198
III. Some Photochemical Fundamentals	20
IV. Photopotentials from Organic Systems	
V. Irradiation of Metal Electrode Surfaces in "Nonabsorbing" Solutions	215

VI. Metal–Metal Oxide Surfaces and Semiconductors	219
VII. Thermal Effects	222
VIII. Electroluminescence	223
References	235
<b>The Electrical Double Layer, Part I: Elements of Double-Layer Theory</b>	<b>241</b>
<b>DAVID M. MOHILNER</b>	
I. Introduction	242
II. Double-Layer Thermodynamics	249
III. Adsorption and Double-Layer Models	298
Appendixes	391
References	405
<i>Author Index</i>	411
<i>Subject Index</i>	422
