

CONTENTS OF VOLUME 8

Introduction to the Series

Contributors to Volume 8

Contents of Other Volumes

Techniques, Apparatus, and Analytical Applications of Controlled-Potential Coulometry

JACKSON E. HARRAR

Nomenclature	2
I. Introduction	4
II. Principles and Scope of Controlled-Potential Coulometry	6
III. Related Techniques	14
IV. Potentiostat-Cell Control System Design	23
V. Instrumentation for Controlled-Potential Coulometry	41
VI. Electrolysis Cell Design	57
VII. Operational Techniques	86
VIII. Analytical Applications	106
References	147

Streaming Maxima in Polarography

HENRY H. BAUER

I. Introduction	170
II. Review of Data and Explanations	175
III. Phenomenological Theory	230
IV. Interpretation of Observed Maxima	237
V. Unresolved and Other Matters	258
VI. Significance of Streaming Maxima	269
References	271

**Solute Behavior in Solvents and Melts, A Study by
Use of Transfer Activity Coefficients**

DENISE BAUER AND MYLENE BREANT

I. Introduction	282
II. Notion of Transfer Activity Coefficient	285
III. Comparison of the Various Assumptions Used for the Establishment of the Transfer Activity Coefficient of Single Ions	294
IV. Redox Reactions	300
V. Acid-Base Reactions	317
VI. Complexation Reactions	327
VII. Experimental Section	331
References	344
<i>Author Index</i>	349
<i>Subject Index</i>	369
