

CONTENTS

PART I : The conductivity and dielectric constant of a solution, and their determination

Chapter 1. Fundamentals	3
Chapter 2. Theoretical fundamentals of the determination of conductivity	18
Chapter 3. Dielectric constants and the principles of their determination	43

PART II : Instruments

Chapter 4. Apparatus for conductometric measurements	53
Chapter 5. Oscillometric apparatus	72
Chapter 6. Devices for measuring dielectric constants	111
Chapter 7. Automatic titrators	118

PART III : Acid-base titrations

Chapter 8. The titration of monobasic acids and bases	125
Chapter 9. The titration of polybasic acids and bases	132
Chapter 10. Displacement titrations	139
Chapter 11. Acid-base titrations in aqueous media	146
Chapter 12. Acid-base titrations in non-aqueous media	159

PART IV : Titrations based on precipitation, complex formation and redox reactions

Chapter 13. Precipitation titrations	177
Chapter 14. Titrations based on complex formation	188
Chapter 15. Titrations based on redox reactions	194

PART V : Other applications of conductometry and oscillometry

Chapter 16. The application of conductometry and oscillometry to kinetic studies	197
Chapter 17. Other applications	204
Chapter 18. Water determination by oscillometry and dielectrometry	210

Bibliography	212
Author Index	225
Subject Index	231
Other Titles in the Series	239
