

CONTENTS

1. Quasi-Equilibrium Theory of Mass Spectra	2
2. Ion-Molecule Reactions	65
3. Appearance Potential Data of Organic Molecules	118
4. Negative Ion Mass Spectra	163
5. Mass Spectrometry of Organic Radicals	207
6. Mass Spectrometry of Ions from Electric Discharges, Flames, and Other Sources	255
7. Decompositions and Rearrangements of Organic Ions	309
8. High Resolution Mass Spectrometry	343
9. Mass Spectrometry of Long-Chain Esters	399
10. Mass Spectra of Alkylbenzenes	453
11. Applications to Natural Products and Other Problems in Organic Chemistry	529
12. The Molecular Structure of Petroleum	597
13. Mass Spectra of Terpenes	637
AUTHOR INDEX	701
SUBJECT INDEX	720
