

CONTENTS

1. Spectrodensitometry of Thin Layer Chromatograms	1
2. Techniques for Determination of Specific Activity of Isotopic Materials by Thin Layer Chromatography	23
3. The Determination of Polymer Molecular Weight Distribution by TLC and Direct Scanning Densitometry	45
4. Quantitative Analysis of the Lipid Classes by Thin Layer Chromatography via Charring and Densitometry	57
5. Use of Thin Layer Chromatography in Determination of Carbohydrates	79
6. Fluorodensitometry of Mycotoxins	95
7. Detection of Amino Acid Abnormalities by Quantitative Thin Layer Chromatography	113
8. Methods for Determination of Steroids by Thin Layer Chromatography	131
9. Determination of Urinary Purines on Anion Exchange Thin Layers	155
10. Simplified Double Isotope Dilution Derivative Methods for Steroid Hormones by Thin Layer Chromatography	171
11. Thin Layer Chromatography of Polynucleotides	189
12. Quantitative Thin Layer Chromatography in Pharmaceutical Quality Control	213
13. Quantitative Thin Layer Chromatography of Gangliosides	235
14. Quantitation of Chlorpromazine and its Metabolites in Human Plasma and Urine by Thin Layer Chromatography	253
15. Quantitation of Pesticides Using Thin Layer Chromatographic Methods	293
16. Quantitative Aspects of Thin Layer Chromatography in Air Pollution Measurements	305
Index	323
