

CONTENTS

Chapter 1	Introduction and Nature of Fluorescence	1
Chapter 2	Apparatus	10
Chapter 3	Correction of Excitation and Emission Spectra	30
Chapter 4	Fluorescent Metal Chelates	54
Chapter 5	Quantitative Fluorescence Methods for Metals and Nonmetals	77
Chapter 6	Fluorescent Indicators	102
Chapter 7	Fluorescence in Qualitative Inorganic Analysis	116
Chapter 8	Spectrofluorometry with Column, Gas, Paper, and Thin-Layer Chromatography	125
Chapter 9	Application of Fluorescence in Agriculture	141
Chapter 10	Aflatoxins	170
Chapter 11	Proteins and Amino Acids	176
Chapter 12	Polynuclear Aromatic Hydrocarbons	200
Chapter 13	Organic Compounds	210
Chapter 14	Vitamins	226
Chapter 15	Steroids	232
Chapter 16	Chemiluminescence	243
Chapter 17	X-Ray Fluorescence and Atomic Resonance Fluorescence	249
Chapter 18	Clinical Fluorometric Procedures	256
